LIQUOR FLOWS IN COAST PROVINCE, IT IS ALLEGED

THE CHRISTIAN SCIENCE PUBLISHING SOCIETY

Under "Moderation" British Columbia Has Grown Steadily Wetter

WETS ARE SEEKING

Being Increased All the Time

Because of the persistence with schich the wets in the United States have put forward the system of liquor control in certain provinces in Canada as a model, The Christian Science Monitor recently sent a staff correspondent to the border to make an investigation of conditions there. The result of his investiga-tion appears in a series of articles of which the following is the thir-

· VICTORIA (Staff Correspond-ence)—British Columbia, to which United States wets point as an exam-ple of ideal liquor conditions, sought to compromise between temperance and the bar. In this bargain the bar and the bar. In this bargain the bar has triumphed overwhelmingly. Once having scrapped prohibition, the province found itself flooded with liquor. From one step to another it has grown steadily wetter. The entire experience of this Province has proved the hopelessness of handling liquor in any way except by its prohibition. The history of liquor here is a complete enswer to opponents is a complete answer to opponents of United States prohibition laws who argue that a more liberal liquor policy will protect the country from

British Columbia has proved, on the contrary, that "moderation" means illegal bar conditions immediately and then, the return of the bar sup-ported and protected by the law.

only by men but by women and girls, not welcomed by organized labor, and and in this respect is a more serious eventually he drifts back to the problem than the old bar of preprint of the country, in a far worse economic condition than before.

"I feel that this process is depressing the morale of our rural population. There are two classes of farmers. First, those who can and will stay out the farm regardless of the country. moderation" it voted for the ex-clusive sale of liquor by the Gov-ernment in government stores. No provision for the drinking of liquor provision for the drinking of liquor of any kind except in private premises was contemplated. In fact, abolition of private profit on liquor sales was one of the chief planks in the wet platform. But scarcely and energetic farmer, who will not had the wets won this opening victory than they opened a new cambatta. had the wets won this opening vic-tory than they opened a new cam-paign for looser liquor regulation paign for looser liquor regulation
Bootlegging flourished openly under
the new system, which was designed
to end bootlegging forever. The wets'
solution was the wider legal sale of
liquor in competition with the illegal
vendor. They demanded the opening
of beer parlors where beer would be
sold by the glass under private ausplices. This, they said, would provide
ample drinking facilities, reduce the
best strains, leading toward a less
efficient agriculture, carried on by a
less intelligent rural population,
which will not form the sound basis
for our national life that has characterized the United States from the
beginning."

Legislation has put the farmer in sold by the glass under private aus-plees. This, they said, would provide ample drinking facilities, reduce the consumption of hard liquor and do away with the bootlegger altogether.

Beer Interests Succeed At first this movement was subpressed. In 1923, the beer interests managed to secure a vote in the Legislature in favor of a plebiscite on the beer question. At the subsequent general election of 1924 this plebiscite was held. The electors recorded a provincial majority, against private beer sale of 1714. The results of the plebiscite, as a result, were enforced on the local option plan. Those districts which voted for beer got it, despite the total dry vote, and the result, of course, has vote, and the result, of course, has been that every legally "dry" district near a legally "wet" one has been made wet in fact regardless of its

efinitely brought back the bar and the sale of liquor by private interests for profit. In other words, Government control of all liquor ended there—a big part of the liquor business was taken away from the

AS 'DEGRADING' AFTER A SURVEY

Move Made by Fraternal Orders to Abolish the **County Institutions**

DES MOINES, Ia., July 26 (AP)-An organized effort to abolish the alms-house as an American institution will be launched as the result of an investigation financed by a dozen fraternal organizations and the United States Department of Labor. Harry C. Evans of Des Moines, spe-cial commissioner of Secretary of all Labor Davis, in a report made public Mrs ipon a two years' nationwide survey Prof. Taylor Finds Them Dissatisfied With of almshouses, recommends complete abolition of the prevailing county poorhouse system and the continuance of its essential functions a central home for the "aged and riendless" in each commonwealth.

The present system, under which each county maintains a separate in-stitution, is described in the report as "the worst mismanaged public business in the world," and "the symbol of humanity's degradations."
The central home plan will be submitted together with a detailed report of the survey, to the Annual Convention of Fraternal Congresses at Buffalo, N. Y., on Aug. 16. A score of affiliated societies will be urged to assist in bringing the commissioner's findings and recommendations to the attention of every State Legislature during the next two years.

'PLATFORM MEN' ASK MORE PAY

Wage Appeal of Mass. Rail Employees Being Heard at the State House

Asking a wage increase from 61 to 74 cents an hour for "blue uniform men," and an additional 10 cents for one-man car operatives, employees of the Eastern Massachusetts Street Railway—once the second largest railway in the United States—today began the presentation of an elaborate case before an arbitration board at the State House.

The hearings are the culmination of a long wage dispute; and are expected to continue more than a week.

pected to continue more than a week. John C. Leggat, judge of the Middle-sex County Probate Court, is the neutral arbitrator; the railway line is represented by Fred E. Cummings, vice-president and general manager, and the men by James H. Vahey who also conducts their case.

stay if profits are not forthcoming, who is striving to get into other industries. If he cannot move, he tries need other occupations.

"This process saps the farm of its of striving leading toward a less efficient agriculture, carried on by a less intelligent rural population, he will not form the sound basis for our national life that has characterized the United States from the beginning."

Legislation has put the farmer in the condition he is in today and legislation can life him out of it, Professor Taylor said.

Legislation has put the farmer in the condition he is in today and legislation will follow the presentation of evidence. As a counter proposal to the em-vision of the manager, and the men by James H. Vahey, who also conducts their case, as is his custom.

It is the intention of both parties to the dispute to go deeply into the economic conditions surrounding the Eastern Massachusetts road and the least two days and a half for the presentation of evidence, and many a experts of national prominence will in the condition he is in today and legislation will follow the presentation of evidence.

As a counter proposal to the em-vision will follow the presentation of evidence.

instruction through studying her own experience with the handicaps confronting the teacher no parental co-operation in the teaching of music to young pu-pils. Miss Cunningham believed there was a field for the developmen of child capacity in music at an earlier age than has commonly been observed, and she felt that such de-velopment would show a pronounced beneficial effect on the child's capacity to take advantage of later regu-lar courses of music instruction and, indeed, upon the ultimate evolution of musical taste in later life.

Advantages not only of beginning music is that it establishes one more the appreciation of music in children bond of sympathy between children during infancy, but of increasing the number of children enabled by such early, directed work for naturally

music department of Boston University, at Jacob Sleeper Hall.

Miss Cunningham is a music teacher in Lexington. She became the pioneer of the preschool music instruction through studying the child. The sounding of the first tone should be an event of equal significance too.

significance too.

It is not true that the tones of children have no musical quality.
Their relative significance is often lost because it has not been customary to accide infants with any deran shear gree hatever of musical competency.

Learn To Speak and Sing To begin to instill the principles of rhythm in children while they are yet infants is not to begin a whit too soon. To teach children to sing as city to take advantage of later regular courses of music instruction, and, indeed, upon the ultimate evolution of musical taste in later life.

She spoke today of the fact that Dr. Ahchibaid T. Davison, in his "Musical Education in America." maps out the progress of musical education from the elementary schools to college, expecting the colleges to set standards through their entrance requirements, but that no provision is made for music in the provision is made for music in the preschool years.

Soon. To teach children to sing as they learn to speak is not impossible and children, so taught in their first year, progress rapidly until the time they enter the first grade in school, when teachers welcome them as a distinct addition to their classes because of their unusual musical grounding. If such grounding could be made usual instead of unusual—and, of course, it can be—it would be a great advance in the course of musical education.

"It was in 1920 that I began to work out my preschool music plan

Eacouraging Work

"This work in music among preschool children is an encouraging work for all music teachers," Miss Cunningham pointed out, "because it enlists not only teachers, but parents and often the large company of relatives. President-Emeritus Charles W. Eliot has kindly written of the program I am seeking to develop. It would take some years to make the American common people as musical as the Russians or the Italians, but you are taking care of that good work at the right end."

"It seems to me that the initial service of preschool training in (Continued on Page 18, Column 1)

ALMSHOUSE SEEN Dan Moody Wins; Texas Waits for Mrs. Ferguson to Resign INTO ILLINOIS

BOSTON, MONDAY, JULY 26, 1926-VOL. XVIII, NO. 203

Subjected to sharp attack for the active part her husband, James E. Fergueon, who was impeached as governor some years ago, has taken in Texas' government during her term of office, Mrs. Ferguson apparently was considerably outdistanced in the primary election by Dan Moody, Texas Attorney-General.

In event Mr. Moody does not receive, on the official count, a majority of all votes cast in the Democratic primary Mrs. Ferguson will have annecting Massachusetts avenue in Bosthe Metropolitan district

Of the total of \$452,847.60 which Boston is required to pay between now and Nov. 1, \$410,846.71 is to be met by loans to be issued outside the debt limit, while Boston's share of the Metropolitan Park assessments of \$42,000.89 will come out of this year's taxes, said the Mayor.

The total cost of the Western Avenue and Arsonal Street bridge.

total for Boston of \$35.25.1.

The total cost of the Western Avenue Bridge, is \$309.726.83, of which Boston's share outside the debt limit is 35 per cent, or \$108.404.33; \$25.597.25 to be raised out of the taxes, making Boston's total share in the cost of this bridge \$134.301.64.

For the Harvard Bridge, or the Massachusetts Avenue hridge, the total cost is \$522,296.56, of which Boston's share is 45. per cent, or a total of \$335,033.45. No assessment is laid upon Boston by the Metropolitan Park Commission for the laying of taxation on part of this latter construction.

The work on these three bridges—the Arsenal, Western Avenue, and Harvard Bridges—has been completed, and Mayor Nichols said today that he has been advised of that fact by the State Treasurer and informed that payments on account of the commission of these improvements is due to the State from the city of Boston on the date mentioned above.

Another bridge, or the Cottage Farm Bridge between Brookline Street in Boston and Essex Street in Cambridge, is in process of construction and no levy is made therefor upon the city at this time.

The bonds to be issued by the city, Mayor Nichols stated, for the payment of auch part of Boston's total obligation as lies outside the debt limit will be through the selling of short-term serial form bonds.

SENATE INQUIRY PRIMARY BEGINS

Mr. Reed of Missouri Brings Out the Fact That Power Magnate Gave \$100.000

CHICAGO, July 26 (P)-Frank L. Smith has testified before the Senate Campaign Committee that his suc-cessful contest for the Illinois Republican Senatorial against William B. McKinley cost approximately \$250,000, of which Samuel Insull, Chicago traction magnate, gave \$100,000.
"How much was agreed upon?" Mr.

Reed asked. "A reasonable amount," he replied. The senatorial candidate said he knew only in a general way as to

the sources of campaign funds. At the outset, Mr. Smith asked to be permitted to make a statement, but James A. Reed (D.), Senator from Missouri, and chairman, declined to permit him to do so, explaining that the custom was for witnesses to answer questions put witnesses to answer questions put by the investigators.

Campaign Chairman Summoned

The chairman of the Illinois Commerce Committee testified that Allen F. Moore of Monticello, Ill., former member of Congress and Republican National committeeman for Illinois was the chairman of his state cam Issue a subpoena for Mr. Moore,

directed Mr. Reed.

Mr. Smith said he did not know the names of any of the members of his committee except that of Mr. Moore. He added that he had sought to get Garrett Kennedy to manage his campaign, but he was a candidate himself for State Treasurer.

"Did you have any talk with Moore or others of your committee about campaign contributions?" Mr. Reed

"Yes, with Mr. Moore," Mr. Smith Amendment and the federal plan of replied, and added that he told Mr. splitting road and natural resource Moore he could give but very little conservation costs "fifty-fifty" with to the campaign.

doore he could give but very little of the campaign.

"That's indefinite," Mr. Reed relied. "How much did you give?"

"Five thousand dollars," Mr. Smith
epiled.

"By check?"

"No in currency."

"Conservation costs inty-inty with the states, were advocated in the principal address before the Governors' Conference which opened a three-day session here today. Governor Pinchot, of Pennsylvania, atressed these two things in his ad-

asked Mr. Reed.
"I am telling all that I know of the contributions," answered Mr. Smith.
"Just what Mr. Moore told me of."
Mr. Reed explained that the com-

charges."

"But, Senator," Mr. Smith interrupted, "charges have been made.—"
"I'm not going into that," said
Mr. Reed, and he turned to inquiries about the advertising expenses of the Smith campaign.

The witness said that billboard advertising in his behalf was "taken care of by Mr. Wrigley."

"Consciousness."

John A. Bennett, executive secretary of Governor Pothier of Rhode Island, was named temporary secretary of the conference.

-A statement denying that President Coolidge had made any assertion about foreign debts or mentioned trade agreements in connection with such debts, as reported in the Syracuse Herald yesterday was issued at the executive offices today.

"The President has made no statement," the announcement said, "and authorised no interview concerning our foreign debts or trade agreements. Any claim to the contrary is without foundation. He did remark to a visitor that foreign debtors could pay their debts in part from foreign trade. He has not mentioned trade agreements."

"I know," he continued. "that it is very hard for the people of the

United States to understand tha there are wicked elements who at-tempt to cover their political ambi-tions under the mantle of religion. "I envy the United States in that

respect, and I know that the churches of the United States distinguish between religious and political con-duct. But in Mexico, from the time of independence to the present, the Catholic Church has been a constant political problem.

Church's Influence Weakened

"This has so weakened the spirit ual influence of the Catholic church in Mexico that, except for a small percentage of good and faithful Catholics who are unable to see through the church's intrigues, all other Catholics in Mexico who are also good Mexicans make a clear division between their religious duties and obedience to their bad pastors who pursue political and temporal

'Naturally, my Government does "Naturally, my Government does not contemplate making the religious regulations less dratic because of the attitude taken by the political Catholic leaders and bad Mexican prelates, as a pretext for opposing the social, constructive and revolutionary work we are carrying on.

"Each new opposition, manifesta-tion of animosity or hinderance to my Government and its work will serve to establish new penalties for those who refuse to obey the Mexi-

It is announced that a committee of eight members of congregations will be appointed by the priest of each Roman Catholic church to assume charge of the churches July 31 at midnight, when the priests cease their religious duties and retire from the churches under the instructions contained in the pastoral letter. The churches will remain open for wor-ship, but no priests will function.

Letter Threatens Penalties The letter protests against the nev religious regulations promulgated by the Mexican Government, and pro-claims the various penalties which may be imposed against those of the Roman Catholic faith who are re-sponsible for the new laws or in any

way aid in putting them into effect. Among these penalties is ex-com-munication of those who issue laws, regulations or decrees against the rights and liberty of the church, those who prevent the exercise of religious juridiction and those who usurp ecclesiastic property. The letter therefore implies that President Calles and all officials of the Government responsible for issuing of the covernment responsible for issuing of the church, and efforts to get a quorum without the Government responsible for issuing of the church, and efforts to get a quorum without the Government of the church, and efforts to get a quorum without the Government of the church, and efforts to get a quorum without the Government of the church, and efforts to get a quorum without the Government of the church, and efforts to get a quorum without the Government of the church, and efforts to get a quorum without the Government of the church of the ernment responsible for issuing or enforcing the regulations may be ex-

with the expressed views of Pope Pius XI, who in his last apostolic letter spoke of the "iniquity" of the decrees and laws sanctioned by the Mexican authorities against Roman Catholics in Mexico.

lieved, with a view to counteracting that the Government will close the the presidential decree of July 2, churches permanently, on the ground forbidding the denominational press to handle government news, and rether churches to the care of the peo-

quiring religious schools to accept lay education.

The Government looks upon the suspension of the schools and the closing of the churches as a purely political move, and it is anticipated

DAN MOODY WINS IN TEXAS CAMPAIGN FOR GOVERNORSHIP

proved Mrs. Ferguson's course as Governor or his action as Attorney-General in prosecuting suits for the cancellation of large road contracts and for recovery of alleged exorbitant for recovery of alleged exorbi-tant profits from certain road con-tractors, which suits vere contested by Mrs. Ferguson, but won in the courts on confessed judgments against road contractors. Mr. Moody persistently urged the voters to de-cide by their votes which should

resign under the accepted challenge. Repeated appeals from commer-cial bodies, business organizations and legislators, that the Legislature be called to validate the question of road bonds, have been refused by Mrs. Ferguson. While the Legislature can convene on its own call, the Attorney-General's department ruled that members could get no pay under the law unless convened by the Gover-

refuse to resign her office under her challenge and that the Legislature communicated.

The letter was issued in agreement larities of the former highway commissioners.

State Officers Nominated Other state officers nominated to

succeed themselves are Barry Miller, lieutenant-governor; S. M. N. Marrs, superintendent of public instruction, George B. Terrell, com-missioner of agriculture; J. T. Rob-ison, land commissioner; C. V. Terdell. railroad commissioner; S. H. Terrell, Comptroller; William Pierson, associate justice of the state Supreme Court, and C. F. L. Hawkins, judge of the Court of Criminal

For State Treasurer a second MEXICO CITY, July 26 (Special)

ympathetic understanding among states which is so desirable."

State and Federal Enforcement "In dealing with law enforcement there must be no twilight zone be-tween state and federal authority where the enemies of society might hide themselves and escape punish-ment," Governor Pinnchot said. "Neither can we suffer the state-made nullification of our National Constitution, whether under the guise of a state referendum or by the failure of the State to exercise its

ordinate powers.
"I have small sympathy with the view which regards every new use of the federal power as necessarily an usurpation of rights properly be-longing to the states. The recent out-burst against President Coolidge's order for the co-operative use of state and local authorities in law enforcement is a typical example. Federal and state action should be co-operative—not hostile." Although the Governor was sched-

uled to speak particularly on the subject of state finances, he ex-pressed himself largely on other The use of federal taxes for build-

ing of a national highways system, and industry within the states defended by Governor Pinchot. characterized the theory that "each state exists for itself alone" as be-ing "narrow and unworthy."

Ox Carts Greet

Members of Historical Commission En Route to Oregon Cover Old Trail

GRAND FORKS, N. D. (Special Correspondence)-Members of the Columbia River Historical Expedition when on their way to Oregon over the trail of the French pioneers, were greeted at Grand Forks by a Red River ox cart driver, Napoleon Hayden, who led a parade of ox carts hrough the campus of the University of North Dakota.

Napoleon Hayden, who says he is the last of the ox cart drivers, is the son of an Irish pioneer of the Red River valley. His mother was the daughter of a Chippewa chieftain, ston Churchill, Chancellor of the with furs and supplies down the Red River trail to St. Paul. For many years he drove for James J. Hill He became an ox cart driver as soon as he was old enough and drove until the coming of the railroad in 1880 when or carts were discontinued.

when or carts were discontinued.

Large crowds gathered to see the exhibit of three forms of transportation, the ox carts, the first passenger train in Minnesota with its old engine, William Crooks, then called "a topot on wheels," and the moderate Columbia River Special which is carrying historians and students of history over the Great Northern to the Pacific Northwest.

TARTU, Estonia, July 26-An official invitation from the Polish Government to hold the next international congress against alcoholism Warsaw has been received by Dr. R. Hercod, secretary of the perma-nent committee of the congress, The Christian Science Monitor learns today. Tentative offers are also to hand from other quarters, but though the section committee would have liked, if possible, to hold its next meeting in Scotland, the Polish, Government is first in the field with a definite invitation. It is therefore expected that the offer will be accepted and that the next congress will be held in Warsaw two years

Saturday afternoon saw the congress split into several groups, all of which report satisfactory meetings. The Christian churches section, for the first time in the history of these gatherings, appointed a permanent committee to co-ordinate the activi-ties of the various religious denominations. The members of this committee are: Bishop James Cannon Jr., America, Methodist; E. J. Richardson, America, Baptist; Bishop I. Kukk. Estonia, Lutheran; Metro-Politan Alexander, Estonia, Greek Orthodox; Canon Hermann, Switz-erland, Roman Catholic, and one member each to be nominated later from the Lutheran and the Reformed Evangelical churches, Germany. The choice of a secretary has not yet been made, but is expected to fall on Mr.

useful informative week-end discussions, but so far have made no new appointments. However, they have tries. He pointed out that in these still another meeting before the con- countries the potato is considered Graft Then and Now

Among other events, late on Sat-urday there was a forceful speech by Bishop Cannon on the attitude of the cereals

free churches of America toward pro-hibition. Bishop Cannon declared: With still very vivid memories of the old saloon days, the churches have struck a balance sheet and in-sist that the liquor traffic must continue to be regarded as criminal. In the old saloon days," he added, "the liquor traffic was thoroughly or-ganized and prictically dominated the political life of the towns, the cities, the states, and the Nation. . . . The graft and corruption in connec-tion with the prohibition law today concerning which so much clamor is raised by the opponents of the pro-hibition laws is a mere drop in the bucket compared with the graft and corruption which prevailed every-where in the old saloon days. The removal of the liquor lobby from the halls of legislation throughout the

country, with the natural result of among the legislators themselves, is in itself alone a sufficiently benefi-cent result to justify the continu-ance of the prohibition policy. Not only was the saloon the center of political graft and corruption, but a rendezvous, a harboring place, a recruiting station for all kinds of

Nothing New in Conflict

Bishop Cannon then reminded his audience that nine-tenths of the old saloons were beer saloons, mostly controlled by great breweries, that they were absolutely lawless, obeying no restrictions because the ing no restrictions because the brewers paid for police protection and could secure the dismissal of men who tried to enforce the law. "The lawlessness of the liquor traffic itself," he said, "compelled the adoption of a national prohibition law; and, let it be clearly understood, the present day attitude of the expose. present-day attitude of the opponents of prohibition is a lawless attitude. There is nothing new in this conflict with the liquor traffic and its

Finally Bishop Cannon quoted official statistics showing a decrease in drunkenness even in the wet cen-ters like New York up to 50 per cent and more since the prohibition law was adopted.

Case of Swiss Peasant

"Teach the peasant to drink non-fermented cider," urged Dr. H. Müller of Grosshöchstetten, Switzerland, in a paper on Agriculture and Abstinence Reform read at the Con-gress. He declared that peasants usually knew that alcohol was not good for them, but did not know what to put in its place. The peas-ant was also suspicious of the tem-perance reformer because he did not realize that he himself was the chief gainer from the progress of the tem perance cause. Temperance meant bigger sales of milk, of table grapes, vegetables, fruit and fruit juices. The 10,000 daily customers of the

A passenger on a New York and New Orleans limited train, looking under his berth in the morning, found one black shoe and one tan. He called the pornon-alcoholic restaurants of the Zurich Women's Association, for ex-ample, employ the products of at least 52 large farms, not to mention ter's attention to the error. The porter scratched his head in bewilderment. "Well, ef dat

Featuring Remarkable Values

the peasant, by the skillful propa-ganda of the liquor trade, had been ganda of the liquor trade, had been contribute 'both directly and indimade to feel that the interests of rectly to the organization of the liquor and agriculture were one and potato trade."

Various Duties Imposed At present many countries levy a

higher duty on non-fermented wine than on fermented, Dr. Müller said. In Belgium, for example, the duties are 60 francs and 50 francs per hectoliter, respectively. Denmark taxes a bottle of grape juice 4 (Swiss) francs 50 centimes and the fermented product only 75 centimes. In Norway, the tax on non-fermented wines is double that on fermented. In Sweden, where there is a win and spirit monopoly, it is practically forbidden to import grape juice, whereas fermented wine pays only 0.30 crowns a liter. Poland recently lowered the duty on French wines by 9 per cent out of consideration for France, but it prevents the importation of French non-fermented grape juice by imposing a duty of 26 francs

International Office Advocated Dr. Müller therefore advocated the establishment of an international office, with the help of the antialco-holic association, to "obtain facili-ties for importation which would benefit the importing country as well wines and ciders in the wine and

With regard to the question of educating the agricultural popula-tion, Dr. Müller declared that the peasant "is a fanatic for liberty. Let peasant "is a fanatic for liberty. Let us spare no efforts to prove to him showed 100 private beer licenses in to appoint a similar permanent committee to promote the cause of abstinence among Socialists and on Sunday they further decided to establish a central bureau in Berlin with the same end in view. This interest is a same time, the lecturer warned his audience against the control of licenses would be issued, there are with the same end in view. This interest is nothing hinders his forward indeed the habits of drinking in all time. In Vancouver alone, where the Legislature understood about a score that the same end in view. Government and placed in private hands. Government control of liquor had worn itself out in four years. Attorney-General's Views

Many members of the Legislature were not deceived by the arguments in favor of beer, realizing that the opening of beer bars would not be the end of the movement toward open saloon conditions. A. M. Manson, the Attorney-General who administers the liquor law and who used to favor beer sale by the glass did not hesitate to retract this opinion and bitterly oppose even his own colleagues in the Cabinet who supported the beer campaign.

Even some wet members realized the danger of opening up the beer question. Speaking in the Legisla-ture, Col. Cyrus Peck, admitting that he was himself a drinking man, declared: "I'm against beer because it just means the return of the bar. I've two boys growing up in this country and I'm going to vote for the

When the Legislature met last fall of licenses would be issued, there are now 63. While the Assembly was assured time and time again that well-established hotels would receive these privileges, licenses have been issued to road houses and scores of other establishments which are hotels in name only.

Extending Beer Bar

At this time the Province is in the process of extending the beer bar into dry areas. Up to a short time ago the Government refused to open bars in any part of an electoral ridgress closes. Thirteen countries are represented at the students gathering. Harry Warter was here on behalf of America, but there was no English representative.

The beer bar was called a "menace to moral life." in authoritative circles complete con-demnation of the hostile attitude

Selling Beer to Minors Selling Beer to Minors

The sale of beer to minors is another evil which the old bar did not engender but which has sprung up under "moderation." Recently the liquor board suspended the licenses of three Vancouver beer bars because they had sold beer to minors. The proprietors pleaded that they were unaware of the age of their patrons and their licenses were promptly restored—and this in spite of the frequent warnings of the board and the Government that the least violation of the law would bring instant and permanent cancellation of the license involved.

In explaining the restoration of

In explaining the restoration of these licenses liquor board heads said the proprietors found it difficult to know whether boys or girls were over 21 years old or not—and thus ad-mitted the impossibility of preventing the sale of intoxicants to minors. The beer bar has not stored

Complaints Not Lodged
Inquiry at the American Embassy indicates that complaints have not been lodged. No official steps are likely to be taken. What has happened is merely a number of harmless verbal assaults en the occupants of huge tourist cars, reminding them that if they find Paris cheap it is dear for the French, that if the franc has fallen it is partly sue to the policy of the Allies. It is unfortunate that innocent British, the sale of intoxicants to minors.

The beer bar has not stopped drunkenness, but on the other hand, has encouraged drinking among young people who otherwise would not come into contact with, liquor. Nor has the beer bar wiped out bootlegging as its sponsors said it would. This promise, indeed, was the sole argument used for the establishment of these resorts. rgument used for these resorts.

of these resorts.

The beer bar having failed utterly in its purpose of abolishing bootlegging, wets are now demanding still looser laws to prevent illegal sales. As always, their remedy is more liquor. The next move, which was mooted in the Legislature last fall, is expected to be a demand for the sale of wine as well as beer in the licensed premises.

MATTAGAMI PULP & PAPER TORONTO, July 26—Total assets of the Mattagami Pulp & Paper Company, Ltd., will be sold Oct. 11 under court order. Minority interests are contesting the date of the sale and their case will be heard Sept. 16.

WOMAN CLAIMS LAND SEA GAVE AND COURT SAYS SHE'S RIGHT

Full Supreme Judicial Bench Finds That 1912 Title to High and Low Water Applies Now to Tidal Accretions Over Period of Years

"The west line is to be the

Petitioners' Contention Outlined

"The petitioner contends that her southerly line should be continued be-

yond the point marked "bar" on the plan to the point where the westerly line of West Shore Road continued would meet the high water mark.

The respondents contend that the

southerly point of the petitioner's land is limited to the place where the westerly line of West Shore Road

and highwater line met at the time of conveyance in 1912."

on a river or the sea belong to the owners of the adjoining land. Deer-

field v. Arms, Pick. 41. . . It is well established in the case of accretions to land along the seashore that the line of ownership follows the

changing water line. . . The parties bounded their lot on the east by the line of the public way to its intersection with the line of high water

mark on West Beach.
"This being so, there is no legal objection to the monument made by

this intersection moving as accre-

tions take place, just as the rest of the high water front line moves, and the judge (land court) was right

in ruling as he did on this point. He

also correctly ruled that this move-ment could go no farther south than

the southerly limit of the street as

The Court's Finding of Facts

"The principle governing the di-

vision of flats among adjoining own-

a person owns uplands bounding on

ers of upland is applicable to the division of alluvium accretions. If

Ella M. Allen, petitioner, and Clar- a division of flats. ence I. Wood et als., respondents, both parties being extensive landfrom time to time. In fixing the south holders of Westport, from a land line the fudge (land court) found that the shore of Horseneck beach court award, the Full Bench of the does not form a cove, and that in the division of the foreshore of this Supreme Judicial court makes some highly interesting findings concernrun normal to the average coast line." beach the lines of division should ing title to land at high and low water and as to ownership of land built up by tidal accretions.

On Dec. 11, 1912, Mrs. Allen pur-chased land on Horseneck Beach, along the easterly end of a waterfront. This beach extends from the mouth of the Westport River on the west to the "Point of Horseneck," running into the ocean. In 1912 the town of Westport accepted the lay-out of a street there which was never constructed. The selectmen later shifted the layout easterly and the voters of the town accepted this shift at a meeting in 1913.

The first road layout of the town, had it been built upon, would have brought the petitioner's property, "by tide accretion," to an end much sooner than did the second road plan, which made the road run to the point of the beach. Oddly enough the respondents caused considerable of the accretions to the petitioner's

land by building a causeway.

The respondents asked the court to find that Mrs. Allen's holdings are bounded by the original road layout, while she contends that they are limited only by the second road layout and "a moving monument" es-tablished by a constantly changing highwater mark, due to the increasing deposit of aluvium.

Court Sustains Petitioner The court sustains Mrs. Allen. Por-

ons of the opinions follow:
"The description in the deed is in 'aid out, because there could be no intersection of the street line and the high water mark below that the following terms: 'Beginning at the northwest corner of the land point. hereby conveyed in line of highwater mark on the west beach, so called at a point in said highwater line, which is 350 feet southerly from the south line of contemplated Ocean Avenue; thence easterly in line parallel with said south line of con-templated Ocean Avenue 80 feet to the westerly line of the public way leading to Gooseberry Neck; thence southwesterly in the westerly line of said public way to its intersection with the line of highwater mark on said West Beach, so called; then northerly in line of highwater mark on said West Beach to the place of beginning. Together with the right, in common with others, to use said beach for bathing, boating, fishing, driving and walking.'
"The land which the petitioner now

seeks to have registered is a much larger tract than that literally described in the deed. This additional land has become attached to the original tract by accretions from alluvium deposits along the seaward side, which deposits have been made up since 1912 when some of the respondents and their predecessors in title raised the height of and at-

lindale Board of Trade will be held at Lake Pearl, Wrentham, on Wednesday. There will be a general closing of the stores in the district for the entire day. OIL CLEAN AFTER 30,000 MILES BY USE OF MOTORCAR FILTER

"Streamline" Device Proves Successful in English Test-Smallest Particles Caught by Straining Between Paper Sheets-Method May Lessen Wear

The modern motor vehicle engine has been brought to such efficiency, that it would seem to have almost reached a point beyond the fondest hopes of earlier engineers. Yet, every day, some new invention appears which is one more step toward

The streamline filter, as it is comnonly called, has been used success- An echo whose reverberations have monly called, has been used success- An echo whose reverberations have set on a stay running diagonally fully in industrial plants for treat- disquieted the services of the First from the foot of the foremast to a ing oil which would otherwise be Congregational Church here since wasted, making it fit for further use the erection of the edifice in 1897 has wasted, making it fit for further use in the machinery. Contrary to general belief, this reclaimed oil is just as good, if not better, than when in the original state. A small filter, working on the same theory, has been exhaustively tested in motor vehicles and found most satisfactory in every way.

The filtering plan employed is a method of spreading the oil into films. This is done by employing a large number of paper wasfiers, specially treated by a patented process in order to make them impervious to oil. They are strung on a square rod and held together by spring pressure.

In this way a pack of washers is

spring pressure.

In this way a pack of washers is obtained and the oil is driven from outside through the minute spaces

ered with blocks a foot square and less than an inch thick, made of a paper composition. The engineer received a check for \$4400. between adjacent washers, emerging into the space around the square rod and passing on to the system again. Right here it must be emphasized PROJECT APPRO merely goes between adjacent paper surfaces, which are not compressed ogether.

In other words, "edge" filtration is

cluded approval of the application by Boothbay, Me., officials for bridge employed instead of filtration by pen-etration. After a period of use all the impurities are built up into the form of a porous cake which sur-rounds the pack of washers. plaints against bridge construction over Apagadasset river, Bowdoinham, Me., holding that the structure would

examples of grange co-operative effort in the country, did a business of nearly \$470,000, with a net profit of approximately \$17,000, notwithstanding it sold to its members at very low cash prices.

This store carries a stock of upward of \$80,000, attracts trade from a large section of the State of Maine, and, with its big volume of business wholly among farmers, showed a total of "bad debts" for the year of only \$225. The value of the Houlton Grange property is nearly \$200,000, while this grange, the largest subordinate in the world has a membership roll of nearly 1200, Ingenious Cleaning Method

hauled preparatory to renewing the schedule set forth for the middle

R 30,000 MILES

IOTORCAR FILTER

Successful in English Test—
the by Straining Between and May Lessen Wear

The method for cleaning the filter is most ingenious. There is a connection for an ordinary tire pump on the casing, and a few sharp strokes of the pump drives air through the washers from inside to outside. In other words the air moves in a direction opposite to that of the difference etc., drops away and falls into a well below from which it can be removed easily. This operation is recommended every 2000 miles.

The filter casing is mounted on the dashboard, and is heated by bypassing some of the exhaust gases, with the result that water is driven off in the form of steam and any gas is removed as a vapor. Both the steam and vapor are returned to the induction pipe. Controls prevent the temperature becoming excessive. The oil passes through the filter once every hour, or every 50 to 50 miles.

This system is borne tested by many motorcar massifecturers in gene and tried by John 8, Lawrence, vice-commodore of the Eastern vene.

In the stay-sail rig main topsails were discontinued for the jib-headed mainsail while on the foremost the combination of fore staysail v hich is position well up on the mainmast, and the main topmast staysail, which is set on a stay extending from the peak of the main to a similar position on the foremast, provided more working sail area without the gaff and a rig that could be more efficiently handled with a reduced crew.

HAS PASSED ON Son of Civil War President pushed up again slowly and with difficulty at the present time. In May, 1925, the average daily productivity of the Russian worker was estimated at 6.15 pre-war rubles. In October, 1925, the month when vodka was restored, this figure fell to 5.79 JACKSON FUND TO AID ert Todd Lincoln, only aurylving son of Abraham Lincoln, who passed on at his summer home here today, served as the United States Secretary

Labor Productivity Low of War, as Minister to Great Britain, and for years as president of the Pullman Company. Under the insistent pressure of the economic administrators productivity gradually improved, and in February One of his two daughters, Mrs. Charles Isham of New York, was at her summer home here. Two of his reached 6.31 rubles. But the situa-tion in regard to labor productivity is still regarded as far from satisfacthree grandchildren, Mary Beckwith and James Beckwith—the children of his other daughter, Mrs. F. E. Johnson, of Washington, came to tory. One of the basic ideas which Rykov, Dzerzhinsky and other Soviet industrial chiefs are inclined to emphasize is that increased wages can only come as a result of increased productivity of labor. Wage in-creased without increased productivstability of the industries and consti tute a serious barrier to the realizaprices on manufactured goods.

During the period from Oct. 1, 1925, to April 1, 1926, productivity of

He served on General Grant's staff, and after the war practiced law in Chicago for years.

In 1880 Mr. Lipcoln was elected delegate to the Republican National Convention of that year, but his place in the convention hall was filled by Stephen A. Douglas Jr. Mr. Lincoln was mentioned for the presidency and received a few votes for the nomination, In the campaign that followed he was shosen a presidential elector for Illinois. He became Secretary of War under President Garfield in 1881.

In 1889 he was appointed United States Minister to Great Britain by President Harrison and served until 1893.

He retired from active practice of his profession in 1889 and gave up in the convention of the presenting in a law firm there. In recent years he lived at Manchester, Vt., in the summer and in Washington in the winter. On Sept. 24, 1895, he married Mary Harlan, daughter of former Senator James Harlan of Sowa.

NEW MOUNT KEARSARGE TRAIL

Month and the case of the motorcar this state of the stat

Trip More Simple

It is 14 miles from the main road to the Stiles Clearing. It is 31/4 miles to last water and 4.9 miles to the summit. Already visitors have discovered that the trip up is rendered more simple by crossing the second logging road to Mirror Lake, as it is called by those who do not know the local habit of calling the sheet of water Shingle Pond. By taking this way the deficiency, established when the old east trail was abandoned, is made up, and by a newer and more carefully plotted way. Nor is this trail the only new one

Nor is this trail the only new one ready for use by summer visitors this season. A new string path, extending from the top of Blueberry Mountain to the Catham Valley has been established to take the place of the ancient road which earlier generations of the natives used and indistricts was too created and indiswhich was too crooked and indis-tinct to please the modern taste in mountain climbing.

The new trail takes the visitor

own the northwest shoulder of the mountain, spreading before him a panorama of most exquisite beauty. It crosses Bickford Brook and leads, with the Forest Service road which was completed last season, to the summit of Speckled Mountain.

Can Go to Ranger Station
Thence it is possible to go along to the Ranger Station which is informally known as Brickette House. This latter location is still subject to approval by the district ranger after which the trail will be cut.

In addition to the Forest Service pathway a new one was built last season over West Royce so that there is now an unobstructed and drect way over Bald Face Range, along Meader Ridge and Meader, along the Basin Rim, over West and East Royce and the return to the valley is comfortably made without the necessity of retracing any portion of the way.

Folk around here have noted with satisfaction the increasing interest

in Moscow, pointed to the necessity of taking preventive measures against the prevalent absence from work, which, he said, was partly to be attributed to drink.

TWO BATHING POOLS GIVEN TO BROCKTON

BROCKTON, Mass., July 26—A swimming pool and bath house costing \$50,000 has been opened in Campello and another of like proportions is to be completed soon in Montello as gifts to the city from Edgar B. Davis. a Brockton man who was. sale of vodka with its 40 per cent alcoholic content has increased the state revenues and to that extent improved the financial position of the Soviet Government, the notable increase in drinking which occurred, especially in the cities, after the ban especially especi

pansion of the Russian industries.

Productivity of labor, which improved at a rapid pace during the latter part of 1924 and the early part of 1925, slumped after the reintroduction of vocks and is only being cents, and non-residents 15 cents, and non-residents 15 cents.

Separate hours have been get aside, uniformly a spoken, not a written, speech.

REPORT GASTON

Democratic Leader to Seek Governorship, Political Observers Predict

Persistent reports that, after two refusals, Col. William A. Gaston would change his plan, and be the Democratic candidate for Governor of Massachusetts this year were widespread in political centers to-

day.

Nomination papers must be filed in the Secretary of State's office by Aug. 10, and while the Republican slate is definitely made up, and with one or two contests, will continue the same two contests, will continue the same in the November election, the Democratic ticket is still unorganized. For months, observers have been saying that 1926 holds a golden political opportunity for Massachusetts Democrats, yet thus far little has been done in obtaining an effective ticket.

Time Nears for Decision Leaders in the party are becoming troused to the necessity of action in the face of the rapidly approaching date when the slate must be complete, and this accounts largely for

the reports today that Colonel Gas-ton has decided to run.

For several weeks, leaders have been urging Colonel Gaston to be-come a candidate, but he has twice let, it be known that he did not care

gram, arranged by the music department, will be presented.

The first in a series of public organ recitals, given every year during the summer session, will be held on Wednesday afternoon at 4 o'clock in the Old South Church, Copley Square. Raymond C. Robinson of the faculty of the Boston University music department, will be the organist. The recital will be open to the public, as well as to the summer session students.

MUSIC CLUBS DECRY "JAZZING THE CLASSICS"

Special from Monitor Bureau

ON GRAIN HEARD

Special from Monitor Bureau

WASHINGTON, July 26—A hearing is being held before the Interstate Commerce Commission on the case of the Maritime Association of the Boston Chamber of Commerce against the Ann Arbor Railroad Company. The questions involved in this case have been before the Interstate Commerce Commission previous to this date, and an unfavorable decision was given the Boston Chamber. It concerns the rates on grain shipments from districts near the Mississippi River via Albany to the Atlantic coast.

The Boston contention was that the rates on grain shipments from districts near the Mississippi River via Albany to the Atlantic coast.

The Boston contention was that the rates were unduly prejudicial because higher rates were charged on shipments to Boston than on shipments to New York and points even farther south. The commission, however, disagreed. The case is now being brought up again under a new guise, and with new evidence entering into the question.

Traveling time rather than on an hourly basis as at present. The road asks a reduction in the wages to 56 ceats an hour and no change in the working hours.

CHAUTAUQUA, N. Y., July 26—
"Jazzing the classics" came under the ban of the church music convention at its concluding session here. A protest by Mrs. Edgar Stillman Kelly, president of the National Federation of Music Clubs, against the suggestions of some critics that jazz was to be the foundation of the American musical idiom, brought a resolution from the convention deprecating "the pernicious practice of rearranging and jazzing the compositions of the great masters, as a menace to religious ideals."

Hundreds of organists and choir leaders from all over the country took part in the convention, which closed with the rendering of Handel's "Messiah" by a choir of 1000 voices, directed by Prof. H. Augustine Smith of Boston University, and accompanied by the New York Symphony Orchestra.

Special from Monitor Bureau

NEW YORK, July 26 — The consuming power of the Russian people, which has been partly cut/off from the outside world since the revoluthe outside world since the revolu-tion, is essential to the recovery of international trade and steps should be taken to make it available to world markets at its pre-war level, Dr. H. Parker Willis, professor of banking at Columbia University and editor of the Journal of Commerce of New York, said at the first meet-ing of the reorganized Russian-American Chamber of Commerce held at the Bankers' Club here. The meeting, presided over by

held at the Bankers' Club here.

The meeting, presided over by Reeve Schley, vice-president of the Chase National Bank, represented, the chairman said, an effort to encourage trade between the United States and Russia, though without engaging in political activities.

Advises Useful Exports

Dr. Willis' address was his first public statement of the opinions he formed in the course of his visit to Russia, from where he has just returned. He argued for a resumption of trade between the United States and Russia, though he cautioned his audience that the goods sold by Amcricans to Russians should in all cases represent articles of genuine

usefulness that would aid the economic productivity of the country.

Dr. Willis cautioned prospective investors or traders with Russia to be circumspect and obtain all the information possible from reliable sources, to assure themselves of the profitableness of their investment. He said the Russian administrators have a big task and are liable to have a big task and are liable to err in judgment, and it would be a service to them if American business

SEEKS CLARITY ON DRY ISSUE

Prohibition for West Africa

Special from Monitor Bureau LONDON—Correspondence between the Bishop of London and the Colo-nial Secretary on the prohibition of liquor in West Africa, has recently been published, the Bishop writing as chairman of the Native Races and the Liquor Traffic United Committee.

the Liquor Traffic United Committee.

He takes his stand on Art. 22 of the Covenant of the League of Nations which provides, among other things, for "the prohibition of abuses, such as the slave trade, the arms traffic, and the liquor traffic." Although the meaning of these words is clear to most people there is doubt in the minds of some. In the Frence text the word 'alcool' (alcohol) is used for liquor, a word used in France exclusively for spirits, so that some people would contend that Art. 22 means only the prohibition of the use of spirits. It is also worthy of note that while Art. 22 clearly of the committee of the committee of the latter raising their standard to Covenant requirements.

Draws Parallel

As to the two evils, the slave traffic and liquor traffic, the Bishop holds that the two stand on an equal based on the latter raising their standard to Covenant requirements. of note that while Art. 22 clearly asks for the prohibition of the slave trade, and arms and liquor traffic, the mandates issued to mandatory powers demands only "the exercise of a strict control over the traffic in arms and ammunition and the sale of spirits" but "to suppress all forms of the slave trade."

Definition a L'ficulty

A convention a L menty
A convention relating to the liquor
traffic in Africa was agreed to in
1919, in which "trade spirits" only
were prohibited. But the definition
of "trade spirits" having proved a
difficulty, a way out was found by
stating the brands which might be
imported. It is now suggested that
the term "liquor traffic" should apply
only to the class of spirits previously only to the class of spirits previously imported for trade or barter with the natives. But the Bishop holds that the term was intended to have a far wider meaning and that if the suggested proposal is indorsed it will be disastrous to the native races.

The Colonial Secretary in his reply draws attention to the enormous reduction in the importation of alcoholic drinks in West Africa, the yearly average having fallen from over 6,000,000 gallons in the period 1907-1913 to 740,295 gallons in the period 1921-1924. He also contends that any other interpretation of 'rt. 22 than that adopted is difficult because "the prohibition of the importation of alcoholic drinks in the coastal districts where the natives have for more than half a century been accustomed to drink imported apirits, would be to impose restrictions on those natives contrary to their wis es, and for which the Colonial Government could make out no convincing c.ae." He goes on to say that the abelition of slavery was a different matter because the Government could give good arguments eriod 1921-1924. He also contends

against it, but that it was impracticable to prevent Europeans from drinking alcoholic beverages and it would be racial discrimination to for-Bishop of London Discusses

Prohibition for West

In his reply to the above the Bishop of London reminds the Colonial Secretary that Australia accepted Art. 22 as implying total prohibition for her mandated territory, and New Zealand and South Africa placed the same interpretation on it. placed the same interpretation on it. The British press and public opinion were unanimous on the point. He also notes that in Art. 22 hopes are expressed that a high standard of administration maintained in mandated territories would react favorably wherever a lower standard.

As to the two evils, the slave traffic and liquor traffic, the Bishop holds that the two stand on an equal basis. The Government's duty, he

As in the question of slavery Euenue in one year, the annual general revenue increased in the 10 years from 1913-1924 by nearly £3,500,000. This should be enough to encourage the Government to abolish a traffic universally condemned as in-

defensible. The liquor traffic in the "coastal area" or southern provinces, concludes the Bishop, is a menace to the

porated for several years, and owns a square mile of land at an elevation of \$600 feet in the Davis Mountains on a site that is one of the most beautiful to be found in the entire west. On two sides are rocky, precipitous cliffs of red and orange and white granite, with high black peaks farther back. On another side the hills are pretty and rolling, while to the "frontward" is open grazing land, miles upon miles, with the white-face Hereford cattle sometimes to be seen grazing in droves. It is never uncomfortably hot at 6000 feet, and in August when the week-length and meetings are held it is often camp meetings are held it is often.

ar area.

The association is composed of Presbyterians, Baptists, Methodists, and Church of Christ people. In the first years Mr. Bloys, friend of the lonely hard-riding cowboys and of the men and women on the remote and far flung ranches, was the sole preacher, controlling his little flock with a gentle hand: But as time went on more preachers were called in Yor the cattle people, seldom privileged to attend "preachin," could not be satisfied with one or two talks a day.

Their demands were too much for one man. Another man, now a vetteran of 40 years' preaching in west Texas, sometimes helped out—the Rev. R. L. Milton, whose home now is in El Paso. But yet other men were called, and for the last 10 or 15 years doctors of divinity from over the State and the United States have been on hand, and five services a day en on hand, and five services a day

Some of the cowboys of the early days are wealthy cattlemen now, but they are loyal to the camp meeting. When they find a preacher they like, they stick by him and keep calling him each year. This year they wanted a man to return who had preached in former years, and they telegraphed for him in Washington, D. C. Sunsily four outside preachers are called in, one for each of the denominations represented.

From the standpoint of modern commercial exploitation, these cattlemen have some "curious" regulations. One is that nothing shall be sold on their square mile of land. No man shall make a material profit. Thus, though one sees tents and camps and a throng of people as at a county fair, there is no hawker of toy balloons, "hot dogs," or "pink lemonade," The association is supported by the ranchmen in volun-

says, is surely not to ask the natives whether this or that shall be pro-hibited, but to guide, direct and guard the people against anything which would hinder their advancement, irrespective of their appetites, "which unfortunately in this case we have created.'

ropeans were not allowed to keep slaves, so, the Bishop says, he finds it hard to believe that Europeans would not be willing to sacrifice their use of spirituous liquors for the sake of the millions of natives living in of the millions of natives living in those territories. In connection with the Colonial Secretary's claim to the reduction in liquor imported the Bishop presents the other side of the case in which trade between 1913 and 1920 expanded from £147,000,000 to £274,000,000. In Nigeria, too, while the prohibition of trade spirits resulted in a loss of £1,000,000 in revenue in one year, the annual general

Tribal Days of Judea Are Recalled by Annual Camp Meetings Which Gather Ranch People From the Plains-Four Denominations Unite

FORT DAVIS. Tex. (Special Correspondence)—One of the most unamal religious organizations in America is the Biors Camp Meeting Association. In western Texas, which is to hold its thirty-seventh annual session are held in the heart of the big ranch country, 16 miles from the marest settlement. Fort Davis, and is, the cattlements own camp meeting, having here established in 1839 by the Rev. W. H. Bloys, a Presbitetian missionary known as the "ownors skypliat".

The grounds have permanent buildings. In the heart of the oak grove that covers part of the section of land is a tabernacle not a meeting of land is a tabernacle not a meeting. There is an electric lighting plant, a water system, and many cottages of concrete and wood. All is simple. Simplicity and democracy are keynoter of the meetings. Cowmen worth their hundreds of thousands of dollars and cowhoys worth their horse and saddle in material goods as quare mile of tand at an elevation of 6000 feet in the Davis Mountains on a site that is one of the most

Cattlemen Cordial Hosts

These cattlemen assembled at the camp meeting are great hosts. The tribal days of old Judse are suggested in a way. For the families stick together in family tribes. Not just a father and mother poking at a little fire and boiling of soup alone, but all their sons and daughters and grandchildren and great grandchildren and great grandchildren and great central oak tree and an open-sided shed. The shed is to cook under, and eat under on the infrequent occasions when rain falls at this season of the year. Every tibe has an oak tree, and some of them three or four.

Some of these camps entertain as many as 200 guests on the Sunday of the camp meeting grounds and remain unprovided for. Not only is an invitation extended to all to "find a place and eat," but the ranch folk buttonhole every visitor and make the invitation personal. An invitation to "eat" is an affirmative matter, not merely a passive and polite suggestion. The eating, in most camps, is the forest are set from the principal varieties of wood to be found.

Of these, the most important is the forest acconcinated on the Errors Department has concentrated on the extraction of teak wood only. Teak grows rapidly to a great height, often exceeding 150 feet, with a straight trunk and widespreading branches. It is very much prized because it is straight in the ground exceptionally strong and durable, its oily nature enabling it to resist the attacks of insects.

Sieepers Imported

The inevitable transport difficulties in the forest are very great. At present, in certain parts of the Presidency, where forests are high and remain unprovided for. Not only is an invitation extended to all to "find remain unprovided for. Not only is an invitation extended to all to "find remain unprovided for. Texas Woman Prosecutor Is Getting Results by Putting the Bootleggers Where They Belong

Only One Acquittal Out of 57 Cases won't continue making or selling the stuff, at least temporarily," said Mrs. Menezes. "Look those over," laying out the summary of the cases and Not a Hip Pocket Case Among handled at the term closing that day Them, Is Her Record The list showed that in no case did a second offender or a producer or distributor of liquor get a chance to satisfy the law out of his profits. They got imprisonment in every case. This is the rule in Judge William H. Atwell's court. Special Correspondence

NLY one acquittal out of 57 cases, and not a hip-pocket charge among them."
So spoke Mrs. Sarah Cory Menezer, Assistant United States Attorney, in charge of prohibition law violations, working under the direction of Henry Zweifel of Fort Worth, the District Attorney, who beamed in a satisfied way at the "casualty list" which the court had made in a couple of weeks' activity. The record read: 57 complaints entered, 51 convictions, 1 hung jury, 4 cases continued for further research, and only 1 acquittal.

"There were nearly 100 men and women sentenced under these charges," said Mrs. Menezes. "Mr. Zweifel estimates that every producer or distributor who is sentenced automatically stops-scores, and maybe Dallas, Tex. "But I see what you are leading up to," she said, "and I'll answer it now. As to whether prohibition is a success or failure. I would say, let's give it a fair chance. If at the end of 25 years it is not working successfully, it can be repealed by the people in the same way in which they enacted it. Less time than that would not be a fair tryout. And while we are trying it, it is the duty of every American citizen not only to observe the law, but to assist in its enforcement, and this means the individualists and the lovers of personnel diberty of the said of the said of the law, but to assist in its enforcement, and this means the individualists and the lovers of personnel diberty of which automatically stops-scores, and maybe hundreds, of the little pint possession The Increase in Crime "Your records here seem to indicate an increase in crime since the enactment of the and the lovers of per-sonal -liberty, of which I am one, as well as all prohibition law," it was rethe rest. "One of the most serious factors in enforcing the law is the unwillingness of the average man to appear in court and testify against the violators. This is true of many, even stanch prohibitionists." marked. "So are the number of births increasing and so are the population fig-ures, if you are deal-ing in lump sums," she replied. "But do you know how stanch prohibitionists."

Besides patting in eight hours or more a day, Mrs. Menezes also performs the duties of housewife. She is the wife of Harry E. Menezes. She holds the opinion that women can be happily married and engage in a professional career the same as men.

After graduating at the high school of Fort Scott, Kan., her native State, Mrs. Menezes spent two years at the University of Kansas; later taking a position in, the office of her father, who was a referee in bankruptey. She is an active Republican, having taken a prominent part in the campaign of Dr. George C. Butte. Republican candidate for Governor in the last campaign. She was a delegate to the Republican state convention in that year and has been nominated as land commissioner by the State-wide Republican Conference, which lined up a full ticket for the primary election to be held July 24. crease' per basis?

The BOSTON MUSEUM buys a bookcase!

A few weeks ago a special meeting of the board of the Boston Museum was called in haste. The subject was the purchase of a bookcase made in the shop of Samuel McIntire of Salem, about 1790. So valuable was this piece that it constituted a major investment.

Fortunately we had studied this piece long ago and embodied it in a group of choice de-signs for the executive offices of today. And such is the integrity of every piece of Danersk Furniture made in our own New England work-shops, by skilled Scotch and English craftsmen.

and almost impassable gentlet of these bodies and persons. If Austria had the opportunity to raise a loan on its own account abroad, it would probably take six to nine months to obtain permission from all these sources. Austria must, therefore, content itself with absorbing slowly the remainder of the loan, by which it has been allowed to make progress—even if it is only at a treadmill rate.

even if it is only at a treadmill rate.

Dr. Zimmerman does not hesitate to point out a few of those doubtful features of Austrian financial administration which are so many reasons why the League has not jumped to fulfill Austria's continually expressed wishes for more money and why so much caution has been observed. A year ago, Austria—by its agreement of 1922—should have dismissed 100,000 state employees. The Commissioner-General points out that to date only 84,900 have been released. He finds further that in March. He finds, further, that in March the Government again made a special grant to increase the salaries of officials, but he intimates that it will be extremely difficult for the Government to find the means to cover this additional expenditure. Nevertheless, taking it all in all, there is no doubt that Austria (a goodness) no doubt that Austria is gradually acquiring economic stability.

NORTH CAROLINA ASKS FOR NEW DRUG LAW

Would Provide Year's Confinement for Drug Addicts

GREENSBORO, N. C. agents that nearly all addicts finally become drug peddlers and so a men-ace to other people. It is admitted that this is a drastic law, but the

"HAMLET" CITY IN GALA DRESS

Elsinore Is Celebrating Its Fifth Centenary This Summer

ELSINORE, Den. (Special Correpondence)-Elsinore, the city of Hamlet, is celebrating its fifth centenary as an incorporated city. Numerous pageants and festivities were arranged, including daily performances-strange to say, not of "Hamlet"-but of "The Taming of the Shrew." This was played in the old Swan Theatre in the courtyard of Kronborg Castle, the stage of which was reconstructed for the occasion. This theatre dates back many centuries and it is known that the English actor, Kemp, who was a contemporary of Shakespeare, played before the King of Denmark

The city received its charter from King Erik of Pomerania, to whom a monument will be unveiled in the old Market Place. In the old days it was far more prosperous than now, for it was at Elsinore that the Kings of Denmark established the so-called "Sound Toll," which all ships had to pay on entering or leaving the Baltic. It is estimated that at the height of its prosperity that at the height of its prosperity borg to pay their dues and take in provisions. The old fortress still stands si-

lently at the entrance to the Sound and the town, too, retains many of its ancient glories in the shape of beautiful medieval buildings, narrow crooked lanes and other fasci-nations unknown to more modern

The festivities included a Mediethis Pennsylvania law allows officers to take up people who are drug services were conducted with mediaddicts and keep them confined for a
year, while taking treatment.

It is said by federal antinarcotics in a mock witches' trial.

Among the recent shipments from abroad which make Belmaison's part in the Furniture Sale this year one of such vivid interest and importance is this delightful collection of French peasant arm chairs, with their painted frames . . . a few are of the natural beechwood . . . and the gaily figured stuffs used to cover them.

The Charm and Individuality of the Materials

It is these coverings in particular which give the chairs their unusual charm and individuality. In many instances lovely and irreplaceable bits of old needlework and Savonnerie have been used for this purpose. Others are covered with the most amusing chintzes and toiles imaginable. And only a few, in pairs, are alike. In most cases there was just enough of the material to cover one chair!

An engaging pair with frames painted a blithe rose-red are covered with apple-green needle-work, figured with little tufts of work, figured with little tufts of rose-red poppies and wheat ears. An oyster white chair has a lovely bit of Savonnerie with a flower and fruit design in rose and gray. Others are painted in agreeable nuances of yellow, mauve-rose, pale gray and blue. And always there is some unexpectedly witty note of color contrast or subtle harmony in the material subtle harmony in the material used with each . . . here a gaily flowered morceau of

chintz, there a quaint chinoi-serie, or a Louis XVI conceit of blue with pale gray ribbons and medallions.

They are chairs that will bring the happiest of decorative accents into many types of interior. Prices from \$65 for the chintz-covered ones to \$130 for those with needle-work and loose seat cushions.

tures are well-considered imprestail gives breadth, strength and unity to her work, and enhances the value of her direct notation of places which have their own charm.

Lady Gollancz has a rather wider Lady Gollancs has a rather wider range and in the past has had considerable success in portraiture, one of her best-known works being her presentation portrait of Dr. George Maclean, the director of the American University Union, Her present exhibits, however, are practically confined to landscapes and marines, mostly of Brittany. She has a sensitiveness for color in its most emotional appeal, but is also concerned with the intellectual character that tone conveys, and she introduces a romantic, in fact almost a dramatic note into many of her pictures. The deep vivid blues and grays of her seascapes are stated with such sincerity and conviction that they seem saturated with the artist's personality, though they can often claim kinship with the work of Monet and Cottet. This last master appears to be a strong influence with Lady Gollancz, but this no doubt is principally due to the fact that the subject matter, Brittany, is common to both artists.

Distinguished and personal is the art of Miss Irms Richter, who technical markets and in her profound knowledge of any main form, but still more in the major fact that this artist reveals in all her work that she studies birds and creatures for their own sakes and not, like so many other artists.

Distinguished and personal is the art of Miss Irms Richter, who technical markets.

This Thing Called Poetry

All poerry seems to be the transformation of existence from grayness to beauty. It clothes "the palpably and familiar with golden exhalations of the dawn." It brings

exhalations of the dawn. It brings us tidings from celestial chambers. And always it is music. In the long epic of the world it hears some liquid notes impearled!

It is in the process of transmuting the materials of existence from the familiar to the beautiful, from the local to the universal that the the local to the universal, that the poet proves his genius. Prof. J. W. Mackail has said that there are the formal and the vital elements in poetry, and he suggests that the two are inseparable, maintain an equi-librium that cannot with impunity be upset. The vital side is very energetic in our day, poets are impatient at the restraints of the past, so they give us manifestations of exuberant anarchy, audacious, if not outrageous, perversity—perversity which upsets all standards and confuses all values. An illustration may carry the point, and at the same time re-

veal how very musical authentic poetry really is. One of our poets has given us this: The implements for daguerreotyping -the tools of the rigger, grappler, sail-maker, block-

maker, of gutta-percha, papiermache, colors, brushes, brushmaking, glazier's implements, veneer and glue-pot, the confectioners' ornaments, the decanter and glasses, the shears and flat-iron

Strangely reminiscent of the junk shop! Compare this wild assortment of noises with the metrical movement and the pulse of vitality in the

poetry.

Shakespeare, however, hampers us when we try to point the difference between prose and poetry. It is diffi-cult to discover where his prose leaves off and his poetry begins; but at his zenith the poet lover can feel in Shakespeare the swing of the tides, the song of the birds, and the cadence of the stars. His greatest moments are his most musical moments.

One of the happiest illustrations of the difference between prose and poetry I have found is in Sir Henry Newbolt's "A New Study of Poetry." He requests us to visualize a coun try churchyard in England at even tide. Some people listening say, "Hark! there is the bell!" Others see the ploughman plodding toward the village, while the farmer points to the cattle as they move to their evening shelter. The poet Gray crushes it all into a perfect stanza

The curfew tolls the knell of parting day.

The lowing herd wind slowly o'er the

lea, The ploughman homeward plods his weary way, And leaves the world to darkness and to me.

That is poetry! It is poetry because it is music; and it is poetry because it is the transmutation of scene by

Keats said "poetry is the wording of our own highest thoughts." Poetry takes words and puts them on a thread of verbal thought. Thus the poets' language becomes a symbol. "A symbol," says Comte Goblet d'Alviella, "might be defined as a morrow, and to-morrow, and to-morrow to day
To the last syllable of recorded time.

will ever be more than a message between heaven and the suburbs. It will ever take in the day's work, even as Millet does in the "Angelus": Every beat hammers home a tremendous impression. It is said so simply and naturally as to possess the spontaneity of song. It is what Dryden said poetry should be, "articulate music." Whitman in the former quotation, defying laws of form has achieved the freedom of anarchy; but Shakesneaks exercising liberty den said poetry should be, arthur late music." Whitman in the former quotation, defying laws of form has achieved the freedom of anarchy; but Shakespeake exercising liberty in law attains a piece of poetic perfection. Whitman is a tambourine in contortions, but Shakespeare is a harp in ecstasy.

Padriac Colum, excellent critic somewhere makes a comparison of Thomas Hardy and Robert Bridges. He finds Hardy "hacking out forms to fit his personal conceptions, or also taking up the jigs and jangles classic tradition.

J. M.

A Gift From Armenia

When John's turn came, Mary Christmas stood still for a moment and looked at him, standing sturdily and looked at him, standing sturdily apart from the others in his blue gingham suit, his chubby hands behind him, his wide, inquiring eyes intent upon her face. Then she laughed, like the sound of the spring streams in her own land, and drew out yet another package. . She took two quick steps toward John, and placed over his curly head and around his soft cheeks a silk cap made of the most bewildering colors in orderly rows and topped by the in orderly rows and topped by the most piquant of gold tassels.

painter, etcher has shown a preference for and found a wealth of responsive subjects among the world's toilers. Mr. Landa must be counted among these, and our illustration makes it evident that he has chosen wisely. He is in full accordant sympathy with his models, the man who stands with litted hammer being a specially admirable figure, characteristic of the country of his birth, picturesque in his way, and altogether a different type from his British fellow workers. Although the force has been given its due, and the corner of the landscape has also been kindly dealt with.

The drawing and the placing of the men leaves nothing to be wished for, but what cannot fail to strike the beholder is the bold and effective technique the artist has adopted, and which gives character and strength wealth of responsive subjects among

THE CHILDREN'S

Sarah and Cassandra Step Down

noon and at last the paper-hanger had come to paper Jane's bedroom. Jane had been allowed to choose the paper herself. It had ; ale blue stripes in it and tiny garlands of pink rosebuds. But now that it had been chosen and the man had been allowed to put it on there seemed to be a supprise for Jane. come to put it on, there seemed to be nothing else that Jane could do to help and so Mother and she had agreed that this was a good time for her to take a nap. And because she had been a very good girl she was to take her nap in Grandmother's room, for Grandmother was away on a visit.

Jane loved Grandmother's room.

She loved the big chest of drawars.

"God Bless Our Home"; and the red carpet and of course, when the red carpet and of course, when she did that she just naturally said, "Mama!" Then what a gay time Casandra and Sarah had examining things into the attic and have some new ones more like those in the other rooms. But Jane said "Why, don't you know Grandmother likes her own things? I know just how she feels and when I get to be a grandmother and go to live with my grand-children, I'm going to take my white rocker and my desk and the lamp Mother gave me at Christmas!"

Grandmother's Feather Bed

So Jane hopped up on Grand-children, I'm going to take my white rocker and my desk and the lamp Mother gave me at Christmas!"

Grandmother's Feather Bed

So Jane hopped up on Grand-children, I'm going to take my white rocker and my desk and the lamp Mother gave me at Christmas!"

Just as Jane's doll was dressed in a romper suit and half-hose and had hop her like live Jenes the dell was a good look at the red carpet and of course, when she did that she just naturally said, "Mama!" Then what a gay time Cassandra and Sarah had examining that doll and turning her over time that doll shoes before. I'm proud of my doll. Only two other girls that I know have dolls that open and shut their eyes and have real hair was faces."

"Weither did I," answered Cassandra. Then, remembering her manners, she went on, "Perhaps Jane would like to see our dolls," and she brought her own out from behind her chair.

Just as Jane's doll was dressed in a romper suit and half-hose and had had had her the did that she just naturally said, "Mama!"

Then, remembering her my doll. Only two other girls that I know have dolls that open and shut their eyes and have real hair was faces."

"Wax faces?" queried Jane. "Wax faces?"

So Sarah let the mer d and our town had ever heard of buying real doll shoes before. I'm proud of my doll. Only two other girls that I know have dolls sheet before. The proud of my doll. Only two other girls that I know have dolls sheet before. Sarah let the red carpet

Jane knew who the was for just below her picture hung the sampler this little girl had made. And there with her own hands she had worked out in cross-stitch her own name —

"Cassandra, aged nine." "Cassandra, aged nine."

Quite close to this picture hung one in a heavy gold frame of cnother little girl. This one stood primly beside a table. The dress she wore was white and had more ruffles and lace on it than Jane had experse on any other dress. And cassandra, "Who is the shoemaker?" representation of the shoemaker of the shoemaker."

"Who is the shoemaker?" of the shoemaker?" representation of the shoemaker."

r Editor:

am 11 years old and in grade 7A. think Snubs' and Waddles' advenares are very interesting. Snubs is especially interesting to me because I like dogs.

I liked the story of "When Bunny Bobtail Went to Town." I think it teaches us a nice lesson. It teaches us to be contented with what we have.

I like the Current Events. They I like the Current Events. They a very much in school, for we were the focas played to the river. You see, it did not start right out being a road like a straight city street. No, indeed, it grew and grew and long before it was a road it was a road, but it kept on being just as road.

With love to all the editors,

Betty Jane H. Poughkeepsie, N. Y.

I have a big police and half birds, flowers, and little animal collie dog. We just got him clipped friends, all clippings from the Monibout a week ago. He looks very tor. How much enjoyment she has

threaded his needles for him."

"Mercy," gasped Jane, "you talk just like a book! You know what a shoe store is, don't you Sarah?"

"Yes, I do," was the gentle reply.
"My mother takes me to a shoe store to buy my shoes. But I know what a shoemaker is, too, for the shoemaker my father's shoes. there sometimes with Father. I love the smell of it. Father says it is the leather. And the shoemaker keeps his mouth full of tiny wooden pegs the kind he tacks into the shoes. His name is Mr. Roberts and he gives me peppermint drops. But he

"It's on page forty-five. We had it last week. It's the capital of some-thing," Jane glibly informed her.

Sarah's Wax Doll "He brought them when he went there to buy goods for his store," went on Sarah. "No other girl in

Grandmother's Feather Bed
So Jane hopped up on Grandmother's nice soft feather-bed with its blue and white coverlet, and felt so snug. She lay listening to the patter, patter of the raindrops on the porch roof outside, and looking around in a dreamy way at the pretty old-fashioned things.

Best of all, she loved the two pictures which hung just above the bed. One was in an oval walnut frame—the daintiest little maid in the dainfiest little dress of sprigged muslin, made with a low neck and no sleeves and with lacy pantalettes peeping from beneath its long full skirt, She stood on a velvet chair and held a tiny bunch of flowers in one hand.

Jane knew who the swas for just

"Grandmother made that. And let me tell you she cut it out of one sleeve of the dress she wore to the Governor's Ball when she was a young lady. And see her shoes! Our shoemaker made them for her, last winter, when he was at our house.

benetrius wished to know.
"I see no reason why the boys should not have a little outing," said their grandfather; "they have worked very hard during the harvesting."

their grandfather; "they have worked very hard during the harvesting." And so it was settled.

This is how it was that one day Andreas and his two big brothers, Glaukos and Nikolas, found themosphere, which me, Andreas? he asked. Then, without waiting for a reply, he went on: "It seems that your and your grandfather has his own plans for them, but I think that you and I are somewhat alike. When

Glankos and Nikolas, found them selves walking about the streets of Athens with Uncle Demetrius.

As they went from one place to another their uncle toll them how at one time Athens had been considered not only the most beautiful city in the world but the center of learnered not only the most beautiful city in the world but the center of learn-

"For years I struggled along with the few books that I had, trying to learn what I could, and then one day I decided to go to America. I had heard there were schools and colleges there where a boy might get all the education he desired. "Your grandfather gave me what money he could and I sailed away to constant it was a long time bestatue itself was executed as long ago os 410 B. C., nothing more perfect in the way of sculpture had ever been given to the world.

The boys admired the graceful horses of Phidias and were told that although the youths mounted upon them were Greeks, the horses themselves were Arabian. The great took few he models that

although the youths mounted upon them were Greeks, the horses them-selves were Arabian. The great sculptor took for his models these horses of Arabia because they were the lightest breed of horses known. "See," said Uncle Demetrius, "how cleverly he has caused their manes

the lightest breed of horses known.

"See," said Uncle Demetrius, "how cleverly he has caused their manes to be clipped so that the graceful arch of their necks is not hidden."

As the boys went from place to place their uncle tried to draw a picture in words for them of how the sucient city had once looked.

He told them of the Gymnasia where boys were trained to take part in the great games; of how they learned to wrestle and run and throw the "discus"; and of how proud the Athenian father was of a son who distinguished himself sufficiently to win the crown of laurel leaves.

Said Andreas.

"Yes," was the reply, "I suppose I' did win in the end. The opportunity was there, you see."

A long silence followed, and then Uncle Demetrius said: "I can give you more help than I ever had, Andreas. Will you come back with morent, but the radiant expression in his bright eyes gave Uncle Demetrius the answer for which he had hoped.

(The End.)

He spoke of how Socrates, one of the wisest of the Greek teachers, had spent much of his time in the Agora, or market place; how he was to be seen there day after day in the shabblest and scantiest of clothing, without even sandals upon his feet; how he spent his life observing and talking to the people, learned and ismorant, rich and poor alike, because all were of interest to him.

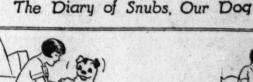

Andreas enjoyed hearing how Socrates met the boy Xenophon, who afterward became a great general. Socrates saw the handsome lad walking in the streets of Athena. He stopped him by holding out his staff before him, and inquired whether he could tell him where certain things could be procured.

Xenophon was able to tell him, and then Socrates asked, "Where can you find men who are highly gifted and noble minded?"

This question Xenophon did not know how to answer, so Socrates

sightseers went up to the Acropolis. Uncle Demetrius had been there be-fore, but Andreas and his brothers

Sometimes it would hide, as when it came to a stony Across bridges and through woods. many lessons, though not letters and figures fust as you learn them. So in the footprints of the Dancing Road, these clever forest creatures could read of races and games. If Reddy Fox and Bruin went for a walk, it was all written on the road. If some birds hopped about and scratched in the dust for their breakfast the dust for their breakfast the dust for their breakfast the control of Dancing Road's tricks.

hide, as when it came to a stony place. And people would say: "Oh dear! We have come to a large city, where it stalked along in such a stately manner that they rocky place, they found Dancing Road it is a boulevard. But all the while, in its heart, it was just merve the dust for their breakfast the

Dear Editor:

I noticed a letter from Sarah P. which tells us that she and a friend have formed a "Nature Lover's Club." The writer has a scrapbok in which are many verses about our birds, flowers, and little animal friends, all clippings from the Monitor. How much enjoyment she has derived from this can not be expressed in words. I am so glad to learn about others' interest in our nature friends.

The editor would also like to thank the following for their letters: Mary Louise R., Margaret W., Joy S., Grace H., Come Sance E., Rita W. (and colored picture), Haydn H.

Less clever forest creatures could read of races and games. If Reddy to at all! When they had crossed the rocky place, they found Dancing Road skipping along as merrily as birds skipping along as merrily as content of Dancing Road's tricks other woods people could read about the load of the load skipping along as merrily as birds hopped about and scratched in the dust for their breakfast, the other woods people could read about the standard of the little Dancing Road's tricks of the little Dancing Road's tricks of the whole woods at all! When they had crossed they found Dancing Road's tricks of the whole woods as att—a few miles it wandered into the woods as att—a few miles it wandered into the woods as atting the rocky place, they found Dancing Road's tricks of the title along it as a trick that the children. And began playing pranks of the prook and vanish.

This was a trick that the children should take off their brook and everybody loved it and everybody loved the place where Dancing Road's tricks once more.

The editor would also like to thank the following for their letters: Mary Louise the padded toes of a dog,

After that I couldn't do anything but dash from one window to another—even though the lady said it would be a half hour or so before he got there!

Key to puzzle published July 19: had never seen the wonderful rock Robin, Dick, Peter, Fred, Edward, Edith, Louise, Kate, Gladys, Betty.

As Andreas stood before the col-

Oh, how they loved the bright blue sky above them and around! Right glad they were that God had let them grow and leave the ground. For climbing up that cottage wall

Triangle Castle

E. Madge Carless.

A Game Here is a new game that boys and rls—big and little—can join in. The first thing to do is to build a The first thing to do is to build a roughly made sand-castle and draw around it a large triangle. Besides this you want several other triangles drawn on the sand at some distance from each other, each large enough for one player to step inside. One player is counted out for the "King" and he stands just inside the castle triangle, and counts 50, silently,—while the others dance around his castle.

Then he leaps over the triangle and rushes out to try and catch the other players. If any one is in danger of being caught and can hop into one of the triangles he is safe.

As the players are captured they are marched back to Triangle Castle and the last one to be taken becomes "King" in the next game.

Flower Puzzle

Each of the following words has four letters, and when written below one another, the initials will spell the name of a flower:

- 1. To bob down.
- Capable. 3. Part of a watch.
- 4. A gentle animal,

EDUCATIONAL

Bridging the Summer Vacation

THE period between the closing of the school in June and the opening of the fall session does not need to be a fallow one for the for their improvement. children of any community. Those children who are able to go away to the seashore or the mountains with their own families, or to boys' and girls' camps, do not constitute the problem of this summer season. The concern of public-spirited citizens is for those in crowded, power districts problem of this summer season. The concern of public-spirited citizens is for those in crowded, poorer districts of our cities and towns, where the street or the alleyway constitutes the only out-of-doors for them. For such children the playground has been instituted, and one of the most hopeful signs of the time is the rapid growth of these centers of juvenile activity, and the growing appreciation on the part of the citizens, especially in large cities and manufacturing towns, of the vital necesfacturing towns, of the vital necessity for supervisors well trained in the drama, story-telling and fellowship; there is a dissemination

"It is my conviction," said Miss Harriet Bell, a well-known and enthusiastic director of plays and pageants on the playground, "that more eants on the playground, "that more can be done with the drama than has hitherto been recognized by my fellow workers. The pageant has already been widely used upon the playground, and it is very useful in bringing into action all the various groups of children, and teaching. But the

these simple plays much social work can be done by the instructor. She comes in contact with the parents through their interest in the chil-dren's work. The mother goes to her piece-bag and eagerly co-operates in the preparation of their very unpretentious costumes; and the father and older brothers are drawn into it in the making of the few simple properties the play may demand.

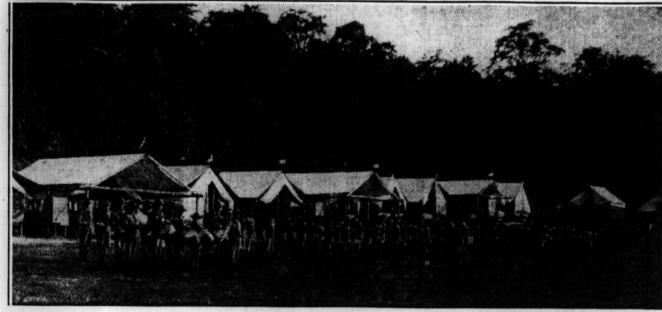

THE BOY" arding Home for Boys. Access sevelt High School. Enrollmen to those whose those whose personal and family les are of the best. \$55.00 per includes all service. Pive acres grounds; billiard room and MRS. MARGARET E. ATKINSON ox 590 Lake Forest Park Kenwood 4344 J 1 Seattle, Wash.

Flowers, Sun, and Rain

"In one community, toward the end of the season, incident to the pageants.
Undirected play, either in the streets or on the playgrounds, is fast being recognized as the seed time of new ideas of beauty and order, and a general brightness and joy created in the preparation of, and the participation in, this Public Day.

for that habit of drifting through aimless or vicious activity. The long summer vacation lends itself most bers of children of the same age in readily to this sort of habit-forming. them, I used the drama work as a The schools in the fall, in communi-ties where no effort is made to day, and worked out, week by week, remedy this, find it almost impossible to get effective work out of the children for the first few weeks. On the other hand, the general testidiren and gave broader opportunities mony of educators is that boys and girls who have been in camps and on playgrounds, where their sports and of little children: "How many of you would like to be flowers, and grow out the nature and care of the flowers. One of the little boys sat in directed, not only retain what they have learned the previous session, but get into the swing of school senting his idea of a certain flower, work again much more easily and effectively.

Greater Possibilities in Drama
"It is my conviction," said Miss The costuming was simple, mostly of tissue paper, and the stage properties were few, for a nature play of that day. Each week developed some new phase of the pageant: the clouds came and drove away the sun and pelted the little crouching flowers gotten by those children."

Scouts Ready for Inspection, Lowering of the Fiag, and Supper-Chank-Tun-Un-Gi

with rain; then the sun secured the help of the rainbow, formed by seven tiers of girls representing the several colors who danced in, bringing back the sun and driving away the clouds. Finally the sandman came III AST year a fond mother allowed and put the flowers all to sleep There were other groups that took the part of children playing in the garden, and they were able to bring

her only son to go for a camp at Chanktunungi with many misgivings. The lad was woman-trained and his associates were largely girls. He was talented along musical and theatrical lines and his mother feared that he would not prosper among a bunch of hearty boys. But he had the grounding of manhood which appealed to the boys and was one of the shining lights of that camp and a general favorite. He goes back this year.

My boy achieved eagle rank by passing the bird test as the final qualification. Have you any idea what it means to be able to identify and accurately describe 50 local birds? Frankly, I didn't know there

requires something more than city meeting places. The organization in every city needs a permanent reservation within a few miles of the city limits, where the lads may breathe the fresh air and learn the glories of individual effort and the efficiency of teamwork, under a discipline which is enforced by their own codes. vation within a few miles of the city limits, where the lads may breathe the fresh air and learn the glories of individual effort and the efficiency of teamwork, under a discipline which is enforced by their own code

osition, one day while working in my door yard I received an injury in one leg and could scarcely get to the house. The boy happened to show up about that time and put on a bandage with some surgeons' tape in his kit. When a doctor arrived he would not remove the handage—said the boy had done all that he could have done. That was just a could have done. That was just a little personal benefit received from training at Chanktunungi.

City's Best Investment

So enamored have I become of the charms of Chanktunungi that I spent half of a cherished vacation within its limits one delightful fall, roaming over its hills and valleys. casting a fly on the waters of the creek, where the fish wouldn't rise because the water had, and loafing around watching the squirrels and birds. This was after camp was closed and school had taken up. On Saturday I had a lot of company, Scouts who had hiked out from the city or from the interurban station at Lawrence, two miles away. Some of them came to qualify on tests, some for just the day's outing, and some to camp over night. The latter had their cooking utensits and sup-piles and about 20 of them, I think, slept in the nut hatch on top of the hill, with a cheerful fire for company. This suggestion from one who has

traveled the road: if you are a parent to a young lad, have him join the Scout organization as soon as he reaches proper age, then bend your efforts toward establishing an equivalent to Chanktunungi within easy reach of your city. The benefits are morally straight."

Last year 30 nations were represented at the Boy Scout jamboree at Copenhagen, at which America carried off the honors — Chanktungungi contributing a star performer. The Boy Scout movement is worldwide, but for full fruition it his assistant and his secretary, a sympathetic and understanding young woman whose helpful spirit has endeared her to thousands of Indianapolis ever made. top selections selling at 30c.

Calf Skin Call Brisk

The call for calf skins during the closing quarter of the current month is fairly brisk on the plumper weights, with caution evident in the weights used in ladies' footwear. Black skins are selling steadily, but largely for manufacturers specializing in men's business footwear.

The better grades of the regular run, plump weights, are quoted at 46c, with some 45c. A well sold-up medium grade is 45@45c.

Side upper tanners report a daily activity. in the medium and lower grades. Owing to the firmness in the packer hide market, one of the leading tanners has advanced prices on the medium and lower grades le a foot.

First quality of chrome sides, plump weight, is quoted at 26@28c and medium tannages at 24@26c. Black sides are about on a level with colors.

The call for bark and combination tannages is fair, the principal part of it for stock obtainable at 16@20c. Elk conditions are unchanged. The bulk of the trading is done on the cheaper selections, which sell freely at 16@24c. Some bookings noted for a grade offered at 26@20c, there is very little doing on the choicer lots listed at 1424c.

MISCELLANEOUS OILS

Chicago

STEEL TRADE CONTINUES AT A GOOD PACE

Heavy Buying by Oil and Motor Industries-Prices Hold Firm-Scrap Up

NEW YORK, July 26 (Special)—Though demand for steel on the part of the railroads and the builders has been falling off perceptibly, the demand from other sources, such as the automobile makers and the oil companies, has kept the volume of business on an unprecedented level for mid-summer, during a peace year.

The Steef Corporation is operating at 85 per dent of capacity while the independent companies are gaited at 78 to 80 per cent. Prices are firm in most commodities, though sheets and strip steel still see some price concessions.

strip steel still see some price concossions.

Iron and steel scrap are the strongest commodity. Dealers who sold short, figuring on the usual midsummer dullness as the time to make their purchases, have been caught and have been forced to pay higher prices. Steel scrap piles in dealers' yards are at a low ebb.

Coke to Great Britain

Coke to Great Britain

The latest development in the steel industry is the shipment of coke, as well as coal, to Great Britain to relieve the fuel shortage there. Furnace coke has sold for export as high as \$3.25 a ton, compared with \$2.75 formerly. It is easy to imagine the cost of steel-making advancing if this export movement of coke gains momentum over the next few weeks.

As regards new steel business coming out, most sales offices in the east find that sales are less than in June but considerably better than a year ago this month. Specifications against old contracts have been turned in more freely during the second half of the month, so that it is too early to judge about July as a whole.

The largest steel order of the week in the East was 30,000 tons of bars, bates.

month, so that it is too early to judge about July as a whole.

The largest steel order of the week in the East was 30,000 tons of bars, plates, shapes, etc., bought by the Pennsylvania Raliroad. The Chesapeake & Ohio will buy 5000 tons of bars, plates and shapes for the construction of 500 cars.

This railroad has the novel scheme of itself buying the steel, turning it over to the car builders and hiring them to do the actual building, the usual method being to let the car builders both buy the raw material and turn it into the finished article.

Pig Iron Still Weak

and turn it into the finished article.

Pig Iron Still Weak

Pig iron is still recognized as weak, particularly by contrast with other raw materials such as coke and scrap. Eastern Pennsylvania iron has sold readily at \$20.50, compared with the former recognized price of \$21.

The buying wave in pig iron is not yet over. Now there are many orders for only moderate tonnages each, whereas, during an earlier stage of the purchasing wave there were few buyers, but very large tonnages, the American Radiator Company for instance having taken 60,000 tons.

Business in steel pipe and tin plate continues the best of all. Demand for pipe has been particularly urgent. Oil country jobbers were not well stocked up this spring. The mills cannot make delivery inside of four weeks and on some siges nine weeks is the best delivery possible.

Tin Plate Output

Tin plate production is about 90 per cent of its theoretical cajacity. The season has progressed well enough for the canners to pretty well gauge their needs and they see much food-packing ahead.

The California fruit crop proved even larger than earlier estimates. Wisconsin will have a huge pea crop though not as large as last year. Added to the heavy demand for tin plate from American sources is the call for shipment to countries that great Britain would normally serve.

Little is heard ordinarily of steel entering steel barrel manufacture. Now it comes into the limelight, since the production of 626,812 barrels in June was a record since 1920.

Demand for rails in other countries has been heavy. German transportation dines recently bought 500,000 tons of rails from the new European rail combine. The French de Wendel works booked 12,000 tons for Turkey. The Algoma Steel Corporation has just received orders for 10,600 tons for the Canadian Pacific and 6000 tons for the Wabash.

Sales of steel sheets in June were il per cent better than during May, while production was only 1 per cent

Roston 14, St. Louis 9. Roston 5, St. Louis 5 (nine innings). Philadelphia 6, Cleveland 5 (10 innings). New York 7. Chicago 4. Detroit 3, Washington 2.

RESULTS SUNDAY New York 2, Chicago 1, Cleveland 7, St. Louis 4, Detroit 14, Washington 4, GAMES MONDAY Boston at Philadelphia.

Maintaining an even pace with the lew York Yankees since July 1, the leveland Indians today stand out as 10 most formidable rival of the lague leaders and are now the choice of fans as the logical club to stop the ankees if this is possible. Philadelhia has proved too erratic for future onsideration as a team that can deat the Yankees; but Cleveland's constency for more than a month is ensetted. more than a month is en-to anti-New York fans.

1. New York has won 13
while Cleveland has won I lost 10 while Cleveland has won and lost 11. During the past week league leaders have captured six of eight games and the runnershave won five out of seven. The pitching of Smith, Shaute, Uhle.

Levsen and Buckeye, coupled with some fine hitting, something that the club has had for many seasons back, as given Cleveland its promising outok. Manager Speaker has accu-ulated a team of .300 hitters and has neld on to his veteran pitchers with the idea that sooner or later they would begin working in unison. Pos-sibly this is Cleveland's season either to win the pennant or to finish as run-

Yankees Are Favorites

to win the pennant or to finish as runner-up.

Yankees Are Favorites

The present margin of nine full games over Cleveland gives New York a strong bid for the 1926 pennant. It is not too much to say that the Yankees stand at least eight out of 10 chances of winning the title. They have held a margin of over five games since late May and, although it has always come back with a spurt which again sent it far out in front. The loss of Meusel and Dugan has been offset by the terrific hitting of Paschal, and Manager Huggins' move in taking Koenig out at shortstop and putting Inzerri in at that position greatly strengthened the Yankees' inner works. However, Huggins is not planning to allow Koenig to remain out of the infield without another opportunity to prove himself. He gave Koenig another chance yesterday, and he fielded perfectly. Ruth's continued home-run hitting is a source of great satisfaction to himself as well as to Manager Huggins. Only yesterday, his home run with Gehrig on base enabled the Yankees to defeat Chicago, 2 to 1. Just when the club moves into a slump Ruth comes along with a home run to set it back on its feet.

Although Philadelphia's slump of the last week resulted in its losing six out of seven games, the Athletics have maintained the pace of the Yankees during the present month with 13 victories and 10 defeats. St. Louis also has a fine record for July to date with 13 victories and 11 defeats. The collapse of the Athletics when first place seemed almost in their grasp resembles closely their slumps of the last two seasons. Poor fielding and poor pitching were had by Connie Mack's team last week.

Detroit's record for July to date is

Detroit's Record Best

Detroit's Record Best

Detroit's record for July to date is

14 victories and 12 defeats. Washington has won 12 and lost 11, Chicago
won nine and lost 13, and Boston has
captured only eight games and lost 17.
The Red Sox won only one out of
seven games last week, but Red Sox
fans are greatly encouraged with the
much better showing made by their
team in the recent games. Detroit has
the best record of the week with seven
victories in nine starts. Although

the best record of the week with seven victories in nine starts. Although Cobb's team did so well and Philadelphia so poorly, it is still one-half a game behind the Athletics. Six of the eight clubs are still playing better than 500 per cent baseball. The New York Yankees open a series away from home with St. Louis tomorrow. After that they go to Chicago, where the White Sox hope to retrieve themselves for their poor showing in themselves for their poor showing in was the series just ended in New York. third. Philadelphia and Cleveland will continue their struggle for possession of second place tomorrow when they meet at Cleveland in a four-game series. The Athletics will then go to Detroit for another hard struggle. The Tigers should continue their impressive record of recent days with Boston as an opponent for the next four days.

MISS RAVIOR TAKES THREE MORE TITLES

PHILADELPHIA, July 24—Miss Margaret Ravior furnished the feature of the Middle Atlantic A. A. U. swimming championship meet yesterday by taking three more titles.

Miss Ravior first won the 220-yard backstroke championship, and then added the 440-yard freestyle and 300-yard medley honors.

Philadelphians dominated the competition. Besides Miss Ravior's triumphs. Norman Marshall of the Philadelphia Swimming Club won the freestyle furlong race after a great sprint against William Hartnett of the Lone Star Club.

Another local victory came is the 440-yard freestyle when Hugh Mc-Caffery, a winner Wednett Wednett and the start was the start when the world freestyle when Hugh Mc-Caffery, a winner Wednett was the start was the

440-yard freestyle when Hugh Mc-Caffery, a winner Wednesday, again splashed his way to first honors. Mc-Caffery also set a Middle States record when he swam the quarter-mile in 6m. 1s.

CAPTAIN HOLMAN TO REFFREE
NEW YORK, July 26—Capt. O. I. Holman, one of the leading authorities on polo in the United States Army, has been appointed referee of the junior championship tournament which is to be held at the Westchester-Bilmore Country Club, Rye, July 21 to Aug. 7. Capt. Holman is himself a player of some ability. He is a graduate of the Fort Riley Cavalry School who has lately been assigned to Squadron A in New York, where he has been instrumental in the development of indoor polo. Last year he preferred with great success the inter-circuit tournament of the United States Folo Association in Philadelphia.

Smith Finally Wins Metropolitan Title

Defeats Eugene Sarazen With Record-Breaking Card of 66

GARDEN CITY, N. Y., July 26 (AP) -Brilliant putting on the part of Macdonald Smith carried the Lake-

Macdonald Smith carried the Lake-ville professional to a record-breaking victory over Eugene Sarazen, the de-fending titleholder, in their play-off for the 1926 Metropolitan open golf championship Saturday.

Shooting a brilliant 66, seven under par, that clipped a stroke from his own record for the No. 3 course of the Salisbury Country Club. Smith emerged triumphant by a 4-stroke margin. Sarazen himself was 3 under par with a fine 70 but even such strok-ing as this was unble to match the accuracy with which Smith controlled his short game, pitching with deadly

skamplonship Saturday.

CAMDEN WELCOMES BOSTON Y. C. FLEET

Annual Cruise Comes to End

Annual Cruise Comments at That Port

CAMDEN. Me. July 26-After a most endoyable cruise the Boston Vacht. Club disbanded yesterday with some of the yachtsmen continuing on to the eastward, while others started for Marblehead and Boston. The yachts arrived here Saturday after a run from Bucks Harbor. Some new boats of those which had been lagging be in the find on previous days due to weather to mind to with the Camden Sand of Trade, and to with the Laders of the canden Sand of Trade, and the canden Sand of Trades and shorts Saturday. The yachts ing me enjoyed a buffer luncheon and dancing. Commodore C. K. Curtis of the flag officers and chairman of the St. research of the east of th The Camden Yacht Club, in conjunction with the Camden Board of Trade, acted as hosts Saturday. The yachtsmen enjoyed a buffet luncheon and dancing. Commodore C. K. Curtis of the Camden Yacht Club entertained the flag officers and chairman of the regatta committee on his steam launch Lyndonia and fireworks were enjoyed in the evening.

Prizes for the races between Christmas Cove and Stonington and Northeast Harbor were awarded. Petrel, owned by Commodore J. R. Hodder of the Boston Yacht Club, was the winner of the race from Christmas Cove to Stonington, G. Young's Hayseed V and T. K. Lothrop's Cricket, tieing for second prize. Hayseed V was the winner of the first prize for the run from Stonington to Northeast Harbor with Marygold second and Petrel third. C. Y. Ferris received a special prize for his yacht, Maylay, making the run from Christmas Cove to Northeast Harbor without stopping.

MOESKOPS CAPTURES WORLD CYCLE TITLE

MILAN, Italy, July 26 (P)—Marti-nctti, Italy, and Peter Moeskops. Holland, won the world's amateur and professional bicycle speed championships respectively here yesterday.

State players won four of the Scotch
foresomes and seven of the singles

WESTERN TITLE GOES TO DOLP

Oregon State Champion Defeats B. E. Stein, 6 and 5-Will Enter National

ST. PAUL, Minn., July 26 (Special)
Frank Dolp of Portland, Ore., proved himself a brilliant player on the greens to triumph over his teammate from the Pacific Coast in the final of the western amateur golf tournament on the links of the White Bear Yacht Club here Saturday, winning the title from Bronson E. Stein, Seattle, by a score of 6 and 5.

the tournament to some Pacific northwest town in 1927.

Kerry's players defeated a picked
team of middle-western goffers a
week ago and Dolp and Stein made
the championship match an all-far
western affair.

It is of interest to note that Dolp
was never down in his five tournament
matches. He had Harrison R. Johnston, St. Paul, down several times in
the 19-hole struggle in which the
Linnesota champion was eliminated,
but the closest Johnston could come
to a triumph was to square the match,
Dolp'h qualifying score was 149, five
strokes more than par for two rounds,
but he never was over par in his
mtch-play rounds. His putting was
one of the features of the tournament.
He holed more long putts than any two
other players and the long ones that
did not drop were for the most part
so close that a breath would have sent
them into the cup.

nals won by was second, ref. E. Wooliey, E. H. Hendren, Roy Kilner, M. W. Tate, Richard Tyldes-ric.

Borg and Skelton Break Two Marks

Each Improves One of His Own Records of a Day's Standing

FREEPORT, N. Y., July 26 (AP)—Arne Borg and Robert D. Skelton. Illinois A. C. swimmers, continued their attacks on world's records here yesterday. Borg erased the mark for the 400-yard freestyle with a 4m. 27145s, performance, clipping 34-5s, from the record he set in New York Saturday.

Skelton, who covered the 400-yard breast stroke in 5m. 48 4-5s, in the New York meet, recorded 5m. 44s, yesterday. The timers were officials of the Amateur Athletic Union.

RESULTS SATURDAY

RESULTS SUNDAY

Boston 8, Cincinnati 4, Brooklyn 3, Pittsburgh 1, St. Louis 6, New York 5 (11 innings). Chicago 8, Philadelphia 4.

MANCHESTER, July 26—Play in the fourth test cricket match of the present series was possible for exactly four minutes here Saturday and in that time the Australians, who again won the toss and are batting first, made six runs without the loss of a wicket. The rest of the day they patiently waited optimistically for the weather conditions to improve. Such a complete waste of precious time makes it appear almost certain that this game will be drawn like the three which preceded it, in which case the fith and concluding contest at the Oval in London will be played to finish.

The teams in the game here are:
Australia—W. Bardsley (captain), W. Woodfull, C. G. MacArtney, T. J. E. Andrews, A. J. Richards, J. M. Gregory, T. Ryder, W. H. Ponsford, W. A. Oldfield, C. V. Grimmett, A. A. Malley, England—A. W. Carr (captain), G. T. S. Stevens, J. B. Hobbs, Herbert Sutchiffe, F. E. Woolley, E. H. Hendren, Roy Kliner, M. W. Tate, Richard Tyldesley, Frederick Root, Herbert Strudwick for the grant of the champions only four games out of 12 to the champions, to stop them. The phillies have lost seven out of 11 to the champions this year. Cincinnati and St. Louis, their strongest rivals, are the only ones conceded a chance to stop them, and the next contended play on the champions' grounds.

Boston Displaces Reds

Boston the club that has grown family for the prederick Root, Herbert Studwick the fall from the top position. Twice they defeated them while Pitts-

son to the .642 average of the Yankees, Pittsburgh has an average of .667.

The Chicago Cubs rank next to Pittsburgh in play during the present month, Chicago has won 16 out of 25 games and last week moved up from fifth place to fourth by winning four and losing three. Philadelphia won four and lost two to again take seventh place away from the Braves. New York won only two out of six and Brooklyn, after a rush toward the top a week ago, was halted last week with only two victories in seven starts. The Braves won three out of eight.

BINGHAM TELLS OF.

Proper Balance Between Scholastic and Athletic Life Sought

OFF GRAND TRAVERSE BAY, July 28 (Special)—Robert Benedict's fine little Malabar schooner Privateer with a 10-hour time allowance over the Cherry Circle sloop Celeritas, which is now leading the fleet, today appears to have a good chance to win the Chicago Yacht Club's race to Mackinac Island. This trim sea-going yacht, flying the colors of the Chicago Yacht Club, rounded Point Betsie into the Manitou Passage, 130 miles from the finishing line, five hours behind the big sloops and was leading the entire second division made up of schooners and yawis. and yawls.

and yawis.

The Vanguard of the fleet passed the Manitou lightship in the following order: Celeritas, Dorello, Intrepid, Pilvateer, Freya and Elizabeth. The Privateer, Freya and Elizabeth. The wind was southeast and favorable. The head winds which caused the racers to put in all of Sunday tacking across the lake and which was decidedly favorable to the single sloops, has given way to southerly bucezes, sending the yachts along at a rapid clip and enabling them to carry every foot of racing canvas. Only two of the 16 yachts which left Chicago last Saturday in the 331-mile classic have been reported out. The sea-scout schooner Nokomis under the guidance of George Fort turned back for Chicago shortly after the rain squalls set in early in the race. Howard P. Baxter's P Class sloop Joyant put into Racine, Wis. for repairs after parting some rigging during the stormy weather early Sunday morning. This yacht carrying a Grand Rapids crew was looked upon as a likely winner. The yachts which have come into range of the coast guard station passed Point Betsle in the following order: Celeritas 11:30 p. m., Sunday; Dorello 11:50 p. m., Sunday; Privateer 5:20 a. m., Monday; Freya 5:25 a. m., Monday. yind was southeast and favorable

FRANCE IS WINNER OF EUROPEAN FINAL

CABOURG, France, July 28 (49)— France is the winner of the European zone finals of the Davis Cup compe-tion, having been victorious in two

than, having been victorious in two singles matches against the British team Saturday. The French Sunday won the doubles. Jean Borotra and Jacques Brugnon defeating George Crole-Rees and Charles S. Kingsley, 6-2, 6-0, 6-3.
The doubles match was a walkover for the French. The English players were never in the running. Saturday, Henri Cochet defeated J. C. Gregory, 7-5, 4-6, 7-9, 7-5, 6-0, and J. Rene Lacoste defeated O. G. N. Turnbull, 6-4, 6-4, 6-4.
Borotra and Cochet left for Paris last night to rest up before their departure for the United States. The French team will now play the winner of the Cuba-Japan series the finals in the American zone.

AMERICAN Y. C. WINS

Boston the club that has grown farmous for displacing leading teams from first place, again caused the Reds to fall from the top position. Twice they defeated them while Pittsburgh was winning. Aug. 4, the champlons go to Bocton for a series and if they are still leading they will have to play hard to keep the Braves from fulfilling what fans have come to expect of them. Cincinnati has a hard schedule during the next week with Brooklyn as first contender and then Boston again at Braves Field. The Reds have found Boston one of their most formidable rivals this year, having lost seven games and won only five against the Braves. The Braves and the Giants are the only two teams that have won more than they have lost against Cincinnati this season.

As in the American League, six of the eight teams are playing .500 percent baseball. However, in comparison to the .642 average of the Yankees, Pittsburgh has an average of .667.

MONTREAL, July 26 (P)—Only two points separated the sailors of the

BROOKLYN BUYS HENDRICK
PITTSBURGH, Pa., July 25 (#P-Wilbert Robinson, manager of the Brooklyn
National League Hasebail Club, annontoced the purchase of Outleder Harnov Hendrick, former Cleveland and New
York American Leaguer, from the New

POLO MATCH OFF AGAIN
FORT WASHINGTON, I. I., July 26—
The polo match between the Orange
County and Meadowbrook teams, scheduled for Westbury Saturday and postponed because of wet grounds until yesterday, when it was to have been played
at Fleischman Fleid, was again abandoned because of the wet condition of
the field, No definite date has been set
for the playing of the match. UPSON WINS AT GREENWICH
GREENWICH. Conn., July 23 (8)—
Lauren Upson, of Englewood, N. J., former University of California golf star,
won the Greenwich Country Club annual invitation golf tournament, defeating A. L. Brodbeck, of Mount Vernon,
3 and 2 in the final round. The winner
captured the only three holes on the first
nine which were not halved, and was
never headed.

AUBURNDALE, Mass., July 26 (Special)—James Conroy of the Scarbore Golf Club won the Massachusetts State Junior golf championship on the links of the Woodland Golf Club Saturday, defeating Francis P. Hersey, Wellesley, 2 and 1 in the final round.

TILDEN SUPREME SUPERPOWER EFFECT IN THE SINGLES

Wins Second Leg on Longwood Bowl - Fine

he lost only six points altogether, and only one game went to 30.

Brian I. C. Norton also advanced two rounds over the week-end, defeating E. H. McCauliff, a local junior, on Saturday, 6—3, 7—5, and Gregory Mangin, one of the beat of those who graduated from junior ranks last year, 6—3, 3—6, 6—1. The summaries:

METROPOLITAN I.A.WN TENNIS SINGLES CHAMPIONSHIP First Round

Vincent Richards, New York, defeated Sekio Tawara, Japan, 6—3, 7—5.

L. Gros, Brooklyn, 6—2, 8—3.

D. S. Strachan, Philadelphia, defeated Russell Phillips, Staten Island, 7—5, 6—3.

Alien Behr, Brooklyn, won from Arthur Arthur Ham, Canada, by default.

Richard Lewis, New York, defeated E. E. Jenkins, New York, defeated E. H. McAuliff, New York, 6—3, 6—3.

Gregory Mangin, Orange, N. J., defeated Shinji Mori, Japan, 6—1, 7—5, won from K. R. Appel, Orange, N. J., won from M. R. Appel, Orange, N. J., won from K. R. Appel, Orange, N. J., won from M. R. Appel, Orange,

UNIVERSITY, Va., July 26—University of Virginia's football team will change its captain and manager before the opening of the season of 1926, for neither Charles M. Mackall of Washington, elected captain, nor John M. Baster, of Seattle. Wash., appointed manager, will be able to serve in the places for which they were named. Llewelly, Miller of Baltimore was appointed manager. The leader of the eleven will not be chosen until the squad gets together for the opening of fall practice Sept. 6.

MISS GLEITZE FAILS AGAIN
FOLKESTONE, Eng., July 26 (P)—Miss Mercedes Gleitze, young London typist, has failed again to swim the English Channel on her third attempt. She started about moon Saturday and was taken out of the water after five hours. She covered about 19 miles, but not in a direct course. Miss Gleitze was followed by a motorboat. As the swim proceeded the wind increased and the seas became very choppy. Waves broke over the head of the girl and drenched all aboard the boat.

HARTFORD, July 28—8. G. Smart, representing the Goodwin Park Golf Club of Hartford, won the New England Public Golf Association championship over his home course Saturday with a 72 and a 71 for a total of 143. Thomas Welch of the Boston team was third, with a pair of 73 for 146. The Goodwin Park Golf Club won the team championship, with Worcester second, Bridgeport third and Boston fourth.

ON LABOR IS STUDIED

Two-Weeks Institute Held at Brookwood College

Special from Monitor Bureau NEW YORK-An institute of electrical superpower, which will con-sider the significance of this new industrial development to organized labor, has just opened at Brookwood Labor College, Katonah, N. Y. Water power resources, coal supply, public versus private ownership, and tech-

nical developments in electrical power production will be studied. The institute is sponsored by the International Brotherhood of Electrical Workers, whose American headquarters are in Washington, D. C. It will last two weeks, and is one of a series of similar sessions on various economic problems Dr. Arthur W. Calhoun, instruct

in economics at the college, will be in charge of general discussions. Outside speakers will include George W. Norris (R.), Senator from Ne-braska; Walter N. Polakov, consult-ing engineers C. M. Ripley, publicity representative of the General Electric Company; Capt. J. K. Robinson. U. S. N., in charge of construction work at the Brooklyn Navy Yard; Morris L. Cooke, chairman of the Pennsylvania Power Commission, and James A. Hamilton, Industrial Commissioner of the New York State Department of Labor.

An institute on railroad labor problems will follow from Aug. 2 to 14, under the joint auspices of the Brookwood College and several railroad labor organizations.

COLUMBIA GETS ITALIAN GIFT

Pictures and Books Presented University by King and Government

Special from Monitor Bureau NEW YORK - Announcement of gifts of valuable paintings and en-gravings from Victor Emmanuel, King of Italy, and the Italian Government to the new Italian House, now being built at Columbia University, was made with the publication of information received from Gla-como de Martina, Italian Ambassador to the United States.

The King's gifts include representative works of two famous Ital-ian artists, the "Cascata delle Marmore" by Bottoni, and the "Ultimo Reggio" by Petiti. The Government, through the Royal Ministry of Pub-

through the Royal Ministry of Public Instruction, has contributed 20
engravings "as a recognition of
this opportunity for encouraging in
every possible way this worthy cultural enterprise."
A unique library, of which it is
said the only counterpart is in Venice,
is being assembled for the house
with the aid of Count Thaon de Revel.
It will contain copies of all reports
of all departments of the Italian
Government giving a complete panorama of the country's civilization
from the time of its unification to the
present. The library will include
15,000 volumes, and digests of the reports will be published by the house,
Dr. Charles V. Paterao has contributed \$15,000 toward its expenses.
A volunteer committee of interior

Butler, communicated with the committee arranging the seventh centennial commemoration in Italy, and the committee in accepting the offer responded with a gift of the two-volume life of St. Francis written by the Mayor of Assisi and arranged to send to the House the bi-monthly

review of the Franciscan order.
The corner stone of the House, according to present arrangements, will be laid on Aug. 5, with the cooperation of the Italian Ambassador, and in the fall a subscription dinner will be held, at which it is hoped to

raise \$300,000 toward the endow-

GENERATORS ON TRAINS SHOULD BE ISOLATED

Individual Car Units Cause Excessive Radio Interference

This is the last of three articles by the British radio writer, L. F. Plugge, describing the use of radio on moving trains while traveling in on moving trains scatte traction schelher Europe. It is a question schelher satisfactory results would be achieved on trains in the United States wing a loop entenna, as the States using a loop antenna, as the cars are all steel, which acts as a ears are at steel, which acts as a shield to the radio waves. Some method would probably have to be devised whereby a small outside antenna could be installed.

On the German trains between Berlin and Cologne I found reception to be exceedingly good and no kind of interference was noticeable at all. On the German trains dynamos are not placed under each coach, and as electrical generating interference fortunately only shows its activity within certain spheres, a great number of compartments are spared This means that reception is as good when the train is in motion as when

it is stationary.

In designing the new rolling stock referred to, railway companies will have to bear this fact in mind and arrange the whole of the electrical lighting system at one end of the train only, either on board the en-gine or installed in the guards' van.

Many interesting features arrest one's attention when listening in on trains. The signal strength is by trains. The signal strength is by no means constant. When actually traveling in the open or on the level, reception is more or less normal. Embarkments, however, cuttings, level crossings, under bridges, tunnels, stations, all have their particu lar bearing on quality of reception and signal strength. In Switzerland and Germany, while passing under power transmission cables, the most unpleasant disturbances are created. They only last for seconds, however, but are very sudden, occurring with-

Boulevard Is Named

After Radio Station

KNX, radio station of the Eve-ning Express, claims the dis-

tinction now of having had the

first houlevard named after its call

The men in charge of developing

this tract are firm believers in

radio and give regular programs

over KNX every week. As a tribute to the value of these radio-

casts they have named their latest

which were communicating their

tremor to the ether within my sleep-

Los Angeles, July 26

out warning.

When passing under a bridge, or through a station at good speed, one notice: that the signal strength diminishes considerably and sometimes vanishes altogether for a few seconds. The position of the vanishmen point is interesting. ing point is interesting. This vanish-ing point does not occur just under the bridge or just in the station, but it occurs some distance beyond the bridge or beyond the station. It ap-pears as it the bridge casts a kind of wireless shadow beyond it and on passing through this shadow one

pears as it the bridge casts a kind of wireless shadow beyond it and on passing through this shadow one gets the vanishing signal as stated. Again when passing through tunnels, the signal strength diminishes very rapidly and while the train is actually negotiating the tunnel signals disappear entirely, only to revive immediately the tunnel has been quitted. These points are all the more interesting, in that they are often inexplicable, subject to exceptions.

A considerable amount of interest among passengers and railroad officials has always been evinced whenever I traveled with my receiving set, and the latter has been a source of curlosity and often admiration to a great number of passengers as they passed up and down the corridor and as the guards came for tickets and the customs officials for luggage. I received on all occasions many visitors in the compartments I occupied who asked permission to listen, and among them were communicating their tremor to the ether within my sleep-ing compartment. Among the stations I tuned in with ease on this occasion, were Daventry and Radio Toulouse. Union Radio, Madrid, Milan, and Rome.

That it is possible to design on Radio, Madrid, Milan, and Rome.

That it is possible to design of maching the interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their without interfering with the activities of passengers using their with among them were several who had never listened to wireless before. Their faces were amusing to watch during their first experience. To me it seemed that they had chosen a rather extraordinary time to listenin for the first time in their lives. Whether it is desirable to obtain

reception in daylight or reception at night is always an important factor consideration and I found, when SUPERPOWER RADIO wireless rains, that the wavelength adopted by any particular station had a greater bearing in this direction than when receiving under stationary conditions Whether the wave worked was a short or a long one had in itself a bearing on the purity of reception and the diminution of interference. I made some particularly respondence)—There has just been interesting o rvations with regard opened near Rio another of the to this ference of wavelengths superpower radiotelegraph stations while traveling on the French train of the Compagnie de l'Est and on the chain extending round the world Dutch State Railways.

On these two railways the short This station is the property of the wave stations suffered from considerable interference. One had only to leira and will communicate at first tune in on a short wave to receive a with New York, London, Paris, Berreat amount of int. rference which lin, Rome and Buenos Aires, branchgenerators and in both asses situated ing out later to other points as its on the train itself. When carying out reception from a long wave station, the same interference was so considerably reduced as to be unmade by the four radio companies-

is worthy of note, too, that long the Radio Corporation, of America wave transmission did not seem to Marconi's Wireless Telegraph Comwave transmission did not seem to be influenced to any appreciable x-tent by the question of whether reception took place in daylight or at night. This, however, I did not find to be the case with the short wave the case with the short wave the case which were received with much greater facility and over greater much greater facility and over greater range at night than in the day time. I happened to be carrying out investigations in Denmark during the weeks of Christmas and New Year. At that time the British Broadcasting Company vere sending out some transoceanic work which will be sup-

Company 'cre sending out some rather late programs from London, which in the case of Christmas Eve were prolonged till 2 o'clock in the morning. This meant 3 'o'clock in the morning in Denmark, a country which ises Central European Time.

I was traveling between Esbjerg and Copenhagen during the night in question, in a sleeping compartment.

The receiving station is situated and the control of The receiving station is situated only about 15 miles from the business center of Rio de Janeiro. In the and Copenhagen during the night in question, in a sleeping compartment of the Compagnie Internationale des s-Lits. I might mention that city itself, there is the usual central office with automatic sending and rethe sleeping compartments on these trains are most convenient for intrains are most convenient for installing a wireless set rapidly and for listening-in with ease. Immediately the train left the Esbjerg station, I rigged up my wireless set, got to bed and put on the headphones. Traveling at great speed, lying comfortably in bed, I was able to receive with the greatest facility, the numerous late transmissions

Radio and Still More Radio

THE average business is something most men are glad to get away from in their "off" hours, but radio is one of those pursuing creatures that seem to follow one wherever they may go. Witness the accompanying picture. The man is no less a person than W. D. Terrell, who is the radio supervisor of the Department of Commerce, Mr. Hoover's most able lieutenant.

During the day, he is continually confronted by radio problems, and as a change from this he works in his

garden, but not without some radio entertainment; therefore, the set and the speaker. However, there is a great difference between the organizational work of radio and the pleasure of listening to good music, so that perhaps the comparison is not really fair. Most business, however, if approached with the proper attitude, will be found to give as much pleasure as radio does.

EDITORIALS

While the attention of the world is being attracted to the downward trend of the franc,

Deflating the French Debt

a chief comment on all sides is whether or not, by permitting a radical deflation of value or by substituting a new unit of currency, France will be repudiating a great part of her public debt. That the inflation of

currency in France would gain such a headway as it has done, or that the public debt would grow to such proportions as is the case, was a contingency which few contemplated five years ago. That the franc will go the way the German mark did is a thing which few are willing to anticipate today. But either contingency does not contain that element of odium that would seem evident upon a layman's consideration. The situation in which French finances are today found to be is one which is but natural and which would be natural to any state that refused for any great length of time to meet its current obligations.

France has been slow to balance her budget Heavy taxes were postponed in the hope that full reparations from Germany would be obtained. Succeeding ministers have endeavored rather to court favor with the voters than to set the country's house in order. A capital levy was unthought of, and taxes were considered already high enough. Unwillingness or inability to balance the annual budgets only added to the debt of the state, and upon Dec. 21, 1925, it was found that the internal debt of France alone had amounted to 309,000,000,000 paper francs and 41,000,000,000 gold francs, or 350,000,000,000 gold francs in the aggregate if the paper franc was to be considered at par value. Obviously this debt was too burdensome for France, as the total estimated public wealth of the country in 1914, including all the real estate, railways, factory and farm equipment, foreign securities. gold and silver, goods on shelves, etc., amounted to only about 300,000,000,000 gold francs, and with the addition of Alsace-Lorraine is probably not any greater today.

Here was a situation which staggered the financial genius of the Nation. France has an internal debt greater than the estimated public wealth of the whole country, and she has the United States, England and other foreign creditors demanding an accounting on the external debt. The country's total debt today is approximately ten times the debt of 1914. Obviously, when it has assumed any such unprecedented figure as it has today, and there has not been any effort to balance the budgets, something radical must happen, and that is just what is being witnessed today. Now bankers point out that if the franc were stabilized at three and one-half cents in value, the internal debt of the country would have been automatically reduced to 56,000,000,000 gold francs, and with an external debt of some 23,000,000,000 gold francs, the country would find itself with a total public debt of something like 79,000,000,000 gold francs, which would be only 26 per cent of the total national wealth.

The world is awakening to the fact that something like this is to happen. It has already happened in other countries, although not to that degree as was the case with either Germany or France. In the United States the old funded debt of the country has declined in value as the cost of living has increased. Values in America are today about 150 per cent of what they were prior to 1914, and by the same degree has the value of the old United States bonds declined. This is not repudiation, it is merely meeting obligations under duress. If a people refuse to meet their obligations through taxation, then it is taken away from them through deflation. It is true that the burden of the obligations falls upon that part of the citizenship which loaned the money to their government rather than upon the owners of the tangible wealth. In that unequal distribution of the penalty for nonpayment alone is injustice

In the war waged by liquor forces against the United States, the contraband army adopted the methods of an invader

Where Many Missing Cars Have Gone

in commandeering transportation. Automobiles and motor trucks were needed to carry illicit consignments of liquor from Canadian sources across

the international boundary line. But the risk of being arrested by the United States preventive service made it too costly to buy cars for the liquor army. Car stealing, therefore, became part of the major operations.

The close connection between rumrunning and automobile stealing would, it appears, account for the sudden disappearance of many cars, especially in cities along the liquor front. How the invaders would proceed is recounted, in part, in the evidence taken before the Canadian parliamentary committee which investigated the administration of the Department of Customs and Excise. Somewhere in Canada. where the exporting liquor warehouses are located, there would be a consignment of liquor awaiting transport to some point in the United States. Agents of the liquor business would look round for the most desirable medium of transportation. In cities like Toronto or Montreal, they would never have to go very far to find a first-class automobile standing in a convenient place. They would steal the car, load it with the liquor shipment, and proceed

The transport agents of the illicit liquor business, with patrons in the United States, might undertake to make several return trips with the same stolen automobile. Or they might regard it as too risky to try to go north through the customs cordon in the same vehicle. The next move, therefore, would be to sell the stolen car in the United States. Behind the rumrun-ning Paffic, a subsidiary industry developed in the form of automobile "bootlegging." Stolen cars could be taken to certain receivers, who maintained special garages for repainting, obliterating identification marks and otherwise disguising the vehicles of the liquor army.

Canada discovered that still another line of illicit business followed hard on the exporting of liquor to a dry neighbor. The liquor transporters would look around in the United States for return cargoes of contraband to take into Canada. Silk goods, radio parts and other dutiable articles would be loaded into stolen cars on the American side, and smuggled for disposal perhaps in Montreal. According to an estimate submitted by the executive of the Commercial Protective Association in Canada. as much as \$5,000,000 of silk goods alone have been smuggled north annually.

The ramifications of this illicit combination of liquor and gasoline included, it is alleged, connivance between car thieves and some customs officials. Certainly there were cases where the liquor transporters seemed to be aided by venal officials. Through the whole story of rumrunning and contraband traffic which has been written into the records of the Dominion Parliament, behind much of the stealing of automobiles, and undermining the administration of a government department, is the corrupting influence of liquor. But Canadian public opinion is aroused. More adequate means to suppress the movement of liquor south, as well as to stop the flow of contraband from the United States into Canada must be found.

According to statements made by a recent contributor to the American Bar Association

Revising Scandinavian Family Names

Journal, efforts are being made in Scandinavian countries to do away, by legislation, with the confusion that has long existed because of the large number of persons who, from generation to generation.

adopt for themselves or have bestowed upon them, family names ending in the familiar, or "son." The writer referred to states that since the beginning of the present century, Denmark, Iceland, Sweden, Finland and Norway, have enacted legislation with two objects in view: first, to induce the "sens" to adopt distinctive family names, and, second, to protect the bearers of old family names in the possession of them and to prevent their adoption by persons not connected with or related to those

It is stated that in Denmark, a quarter of a century or so ago, at least 60 per cent of the people of the cities outside of Copenhagen were known by family names ending in "sen." But it appears that in the other four countries named an even more confusing condition prevailed, owing to the fact that a great part of the population possessed no distinguishing family names at all. The men, of course, were known by their surnames, but these, it is explained, were not real family names, but names assumed by individuals or bestowed upon them by their friends or neighbors, and interded to be descriptive of occupations, distinguishing personal characteristics, or the place whence they came or where they chanced to reside. But there was no assurance, it seems, that their children would be known by their family name or that all would acknowledge the same sur-

Under conditions which existed in the Scandinavian countries in former times, the custom was not particularly confusing. For the purposes of distributing estates, it was possible to trace, by the testimony of witnesses, the lineage of the different claimants. But improved transportation facilities, the propensity of later generations to migrate, and a dozen other causes, have added to the confusion. It was a common European custom, up until comparatively recent times, to bestow upon children only the first or "given" name. In Sweden, it is stated, this custom prevailed until quite recently. The writer of the article referred to states that he personally knew three brothers, who were tailors, all the sons of Petter. These brothers settled in the same Danish town, where one assumed the name of Lundberg, another the name of Lindquist, while the third adopted that of Petterson.

As long ago as 1828 the Danish Government, realizing the disadvantages of the ancient custom, provided that thereafter children, at baptism, should be given not only a Christian name, but a family name. So it came about that the sons of Peter Kusk, for instance, were named, in succession, Hans Peterson, Jorgen Peterson and Jens Peterson. This might have caused little difficulty but for the fact that in time the children of these three sons were duly named Hansen. Jorgensen and Jensen. The result was inevitable. After the passing of two or three generations it was found almost impossible to establish family relationships and the corresponding property rights. Similarity of family names thus bestowed or acquired was

no indication of relationship. "his custom among Scandinavian peoples prevailed at the time of the great influx of emigrants from the northern countries of Europe to the United States, and particularly to the section embracing Wisconsin, Minnesota, Iowa, and what was then the Territory of Dakota. It was followed for some years-perhaps for a generation-to be finally abandoned because of the very confusions which have been referred to. Forty years ago it was difficult to trace the title to lands which had passed, perhaps from their original owners or homesteaders, into the hands of their heirs, and in turn to their heirs children. But this confusion has been ended, happily, through the realization of the neces-sity of establishing and adhering to a distinguishing surname.

With commendable wisdom and zeal, it appears, the older countries have undertaken to accomplish what the self-exiled Scandinavians, by their own efforts, succeeded in bringing about without great difficulty. In the process some incongruous changes took place and became indelibly inscribed upon the registry books of counties and cities. Abrahamsens became Kellys until the end of time, and Hansens and Petersens, who were designed to be thus known for a generation only, found themselves irre-trievably attached to those names through gen-

It has been, no doubt, because of the theory that there is little of romance or of abiding

Marking the Evolution of Business

interest in the development of business and commerce, that up until the present the archives which have been carefully preserved and safely housed have pertained to objects of art. the history of wars, the

development of civilization and its so-called 'periods" or eras, usually without thought being given to those progressive processes by which mankind, in his search for a livelihood, for comfort, and perhaps for a competence, has established and developed the utilitarian processes which are the wonder of the present age. But now, at Harvard University, almost unnoticed by the rank and file of busy Americans, there has been organized what is called the Business Historical Society, Inc. A bulletin recently issued, bearing the marks "Volume 1, Number 1." contains the interesting information that the society owes its existence to the initiative and generosity of two Yale men, Charles A. Moore Jr., and Robert L. Smitley.

The primary purpose of the society, it is stated, is "to encourage and aid the study of the evolution of business in all periods and in all countries." It is proposed also to formulate the results of such investigations and studies and to publish them in such form as may make them of service to the business community. Already several thousand rare volumes have been collected and stored in the Harvard Business Library, which will be the society's depository. Among these books is the collection donated by Mr. Moore and his brother and sister. These were the property of their father, Charles A. Moore, Another gift from a founder member, N. Penrose Hallowell, made possible the acquisition of a large collection of miscellaneous books and pamphlets formerly the property of John Boardman Page, once Governor of Vermont and president of the Rutland Railroad Company and of the Continental Railway & Trust Company, organized to build the New York, West Shore & Chicago Railway. From this data, it would seem, there might be written, in addition to a history of the development of rail and water transportation in the United States, the story of the construction of the Erie Canal, the laying of the First Atlantic cable, the boring of the Hoosac Tunnel, and the development of the American locomotive engine.

In the collection already made is to be found, t appears, a bound copy of Volume 1 of the Railroad Journal." In this one may read of the interest being manifested in the new mode of transportation. On the first page of this interesting book is a tabulation of American railroads then under construction or in successful operation. The list published is, in part:

Baltimore & Ohio-whole length 250 miles-60 miles com

Albany & Schenectady-16 miles in length-12 miles in Charleston & Hamburg-135 miles in length-about 20

miles completed upon which the United States mail is carried. Mauch Chunk, completed and in use, 9 miles. Quincy, near Boston, now in use, 6 miles, Ithaca and Owego, 29 miles. Lexington & Ohio, 75 miles.

Camden & Amboy, 50 miles, Lackawaxen, 16 miles.

Those who have known Daniel Defoe only as the author of Robinson Crusoe and other books perhaps not quite so generally popular, will possibly be surprised to learn that he achieved prominence in a field quite apart from fiction writing. He was a profound student of economics, it appears. There is preserved a reproduction of the title page of his "Plan of English Commerce," one of the earliest studies devoted to the development of English trade.

Even from the data at hand one might enumerate hundreds, and perhaps thousands, of interesting subjects of which the books and maps already assembled relate. For instance, the development of banking, from the estab-lishment of the first bank in Massachusetts, is traced. Another collection of records and picures is devoted to the printing industry, while still another deals with the growth of American shipping. Many of these collections for some reason failed to find a permanent niche in the homes of historical societies. Here, at last, they have a home of their own,

Editorial Notes

Although specifically directed toward the problem of physical fitness, the opinion expressed by Sir Henry Hadow, vice-chancellor of Sheffield University, Eng., at the last annual conference of the London County Council College, has its application equally toward more serious achievement. He declared that the United States was setting Great Britain an example in respect to the question he was discussing, and added that he did not rue nor regret the fact that England had lost her supremacy in the athletic prowess of the world. He saw in this fact simply a challenge to greater effort on the part of Britain. "I hope in years to come we shall attain to the glory which has departed from us," he declared. And he amplified his argument by stating, "It is a glorious leaf in our own crown of laurels that the teachers of physical outdoor games and exercises should have taught other countries in the beginning to achieve supremacy over us." Too much emphasis is sometimes laid on so-called achievement. After all, it is the motive behind which counts oftentimes for more than the actual result accomplished.

That the resolution adopted by the delegates to the Women's Interdenominational Foreign Mission Conference, in session at East Northfield, Mass., asking for a formal declaration by President Coolidge on the status of enforce-ment of the prohibition law to protect the reputation of the United States, especially in the foreign mission fields, was not lightly conceived may be asserted without fear of contradiction. In submitting it, the chairman of the conference In submitting it, the chairman of the conference declared that great investments in the foreign mission field were jeopardized by the propa-ganda reaching them that the Constitution was being flouted in the United States. That being the case, if for no other reason, the sooner the falsity of this belief is established, the better for all concerned.

The Diary of a Political Pilgrim

FROM A LONDON CORRESPONDENT

THE continuance of the coal strike is producing a definite and regrettable deterioration in the temper of the political life of the Nation. The economic condition of the country is not such that it can afford to definite and regrettable deterioration in the temper of the political life of the Nation. The economic condition of the country is not such that it can afford to treat with indifference a prolonged holdup of its basic industry. Yet the longer the dispute lasts, the more difficult of solution does it seem to become.

The action of the Government in passing legislation to give effect to some of the minor reorganization proposals of the Samuel Commission and to legalize an eighthour working day in the mines has been a complete failure, so far as its immediate effects have been. It has hardened the miners' resistance, has temporarily lessened the breach between the Trade Union Congress and the Miners' Federation, and has made negotiation more

It has had these effects because to the trade union world as a whole it has meant that the Government has abandoned the Samuel report and placed itself on the side of the mine owners, who since 1921 have been de-manding the restoration of the eight-hour day. The action of the Government in refusing to bring the eight-hour legislation into force until the Yorkshire owners had come into line with the other owners has done a little to retrieve its reputation with the workers, but not much.

The owners have now posted the terms they offer in return for an eight-hour day. Substantially, they are the prestrike wages for three months, after which wages are to be determined by the proceeds of the industry, subject to the 1921 instead of the 1924 minimum. But these terms, though not so low as was at one time feared, are unaccompanied by any proposals for reorganization.

The miners' leaders still persist in their "never never" attitude. They are evidently more willing to consider a reduction in wages than an extension of hours, for it would be easier to heighten wages than to shorten hours when better times return, but officially their slogan is still "Not a penny off the pay, not a second on the day." Their immediate preoccupation is to prevent a break away of their followers to get back to work on the owners terms after being out for ten weeks.

It is difficult to judge the feeling of the country as a whole about the strike. It is probably true to say that public opinion thinks that all three sides are about equally to blame-the Government for not sticking to the Coal Commission's report and for misreading the signs of the times; the owners for refusing to tackle reorganization and for wanting too much; the miners for refusing to face the economic facts of the industry and accept the advice of the Trades Union Congress to compromise on the Samuel proposals.

Prophecy is proverbially futile in cases of this kind, and I shall not, therefore, attempt to say how or when the struggle will come to an end. But there is little doubt that while it will mean heavy immediate losses, it ought to bear good fruit in the long run. Though bitterness is running high at the moment, each side is coming to realize more clearly its own blunders. We are where we are because both Capital and Labor have been pursuing a short-sighted policy, while the Government has had but little policy at all.

If Capital comes out of this struggle with a clear recognition of the struggle with a clear recognition.

nition that it can only be expected to be left in control of industry if it secures a steadily rising standard of living to the whole people, and if Labor comes out of it

the suffering of these times will not have been in vain.

A great deal of interest has been aroused in Great Britain by the political crisis in Canada. The people's interest, of course, centers mainly in the constitutional aspect of the crisis, and especially on its possible effect on the con-stitutional relations between Great Britain and Canada, rather than on the local aspects, the customs scandals, the tariff question, the relations between East and West, which will probably figure more largely in the contest as

the election proceeds.

People here do not understand the statement which has been made in some quarters in Canada that the action of the Governor-General restores Canada to the old colonial status abandoned in 1867. It is certain that Lord Byng acted on his own responsibility without any instrufrom London, and that if the Governor-General had been a Canadian he would have been in exactly the same dilemma of offending one party or the other whatever

The truth is that the parliamentary system requires as the head of the state a personage who stands above party, who normally exercises mainly official and formal functions, but who at certain times may be called upon to discharge very important duties. For it is his duty a government is defeated in Parliament to decide whether or not a dissolution shall be granted or a fresh attempt made to find an alternative government out of the Par-liament without the turmoil of an election, and to decide upon the individual who shall be given the first opportunity to form a ministry.

Usually the Governor-General, like the King in Great Britain, acts upon the advice of the retiring Prime Minister, but when that Minister offers no advice or gives what the King or Governor-General considers wrong advice, it is his constitutional duty to act on his own initia-tive. The head of the state, in other words, is the ultimate guardian of popular rights against any attempt by a parliament or a ministry to disregard them.

In this case Lord Byng may have acted wisely or unwisely. The opinion here is rather that he acted wisely in refusing a dissolution to Mackenzie King before giving an opportunity to the head of the largest party in the Canadian Parliament to form an alternative ministry, seeing that this Parliament has only been in being for nine months, but that he was precipitate in giving a dissolution to Mr. Meighen as soon as he also had been defeated in the House of Commons. But there is no doubt that he had no option but to act on his own judgment and not on the advice of anybody else.

None the less, though Lord Byng's part in the crists will probably soon be forgotten, there is a general feeling that the ultimate result will be a reconsideration of the legal relations between Canada and Great Britain. There are a good many anachronisms in their present relations, the method of appointing the Governor-General, the method of conducting foreign policy, the appeal to the Privy Council, being some of them. It would probably be a good thing that Canada's relations with Great Britain and with the other nations of the British Commonwealth should be placed upon a more modern and intelligible basis.

The World's Great Capitals: The Week in Moscow

Moscow a remarkably vivid impersonation of a Russian train leaving a station, with all the accompaniment of tooting whistles, blowing steam, hastening passengers and ringing

It is now the open season for airplane flights Moscow. Every Sunday a large crowd gathers at the airdrome just outside Moscow to take advantage of the fifteen and forty-five minute flights which are organized by the Civil Aviation. The charge is five rubles for fifteen minutes in the air and eight rubles for a longer flight of forty-five minutes.

The Russian civil war, a shorter but more complicated historical event than the American Civil War, has found its first historian in Nikolai E. Kakurin, a Red Army odicer who took a prominent part in the campaigns against the Poles and against the Basmachi, or native insurgents, in Turkestan and Bokhara. Mr. Kakurin has now published a two-volume history (the first of its kind) cover-ing the civil war from the Bolshevist Revolution to the defeat of General Baron Wrangel, the last of the White leaders, in 1920. He is also the author of a history of the Russo-Polish War and collected an interesting series of documents illustrating the dissolution of the old army during the period of the Kerensky regime. He will soon publish a collection of the orders and messages which Nikolai Lenine sent to the military commanders and responsible commissars on the various fronts of the civil war.

The results of the vigorous campaign which is being waged against the possible danger of currency inflation are reflected in the Finance Commissariat's statement for May, which shows that the amount of money in circulation was reduced 4.1 per cent, to the amount of approximately 50,000,000 rubles, during that month.

Joseph Vissarionovitch Stalin, the potent General Secre tary of the Communist Party Central Committee, has been revisiting his native country of Georgia, in the Caucasus. The workers of a railroad shopyard in Tiflis, where Stalin carried on some of his first revolutionary activity, arranged a big demonstration for him on his arrival in that city.

The Moscow State Opera 'House has just closed its doors after a season which was very successful up to the end, from the standpoint of popular interest and attendance. A noteworthy feature of the last weeks of the season was the revival of Rimsky-Korsakoff a most significant opera, "The Tale of the City Kiteah," which has not been given in Moscow for fifteen years. Rimsky-Korsakoff is as much of a national composer for Russia as is Verdi for Italy or Wagner for Germany; but "The Tale of the City Kiteah" is deeper and more mature than his characteristic gorgeously colorful operas, in which Russian fairy tales are presented to an accompaniment, of rich melodies and picturesque choruses. The fable of the city Kiteah, which was miraculously saved from a Tartar invasion by sinking into a lake, is a typical medieval Russian fairy tale; but Rimsky-Korsakoff's music goes far beyond the limits marked out by his other operas and in mystical beauty approaches "Parsifal" and "Lobengrin." The fact that the opera, which is quite religious in tendency, was

produced under Soviet auspices indicates a distinct advance in artistic toleration, as compared with the attitude of the theater repertory committee last autumn in proposing to strike "Lohengrin" off the list of operas on the ground of its "mysticism" and to bar Schiller's "Mary Stuart" as "religious and monarchical."

Two hundred and fifty thousand members are enrolled in the Soviet society. Friends of Radio, and this figure, it is estimated, includes only a fraction of Russia's radio users. The society has already opened powerful stations in Moscow, Leningrad and other centers.

"Values and Earning Power of Land"

To the Editor of THE CHRISTIAN SCIENCE MONITOR: Referring to the editorial in the MONITOR, entitled "Values and Earning Power of Land," may I, as an owner and cultivator of land, offer a word of explanation as to the apparently inconsistent views of the present value of take over?

True, the earning power to the owners of most great estates, taken as a whole, is generally accepted as about 2 per cent per annum. The cost of keeping in repair the farms, houses, buildings, cottages, woods, etc., on a country estate, has increased enormously since the war, while rent are very little higher than before.

In many cases owners of estates-almost invariably to the deep regret of their tenants—have been obliged to sell because of the heavy cost of upkeep and the crushing taxation and death duties they have had to pay.

But there is a sentimental-not only a commercialvalue in the possession of an estate, particularly of one which has been in a family for many generations, and this can hardly be expressed in terms of pounds, shillings and pence. And before an owner would consent to part with it he would naturally ask a much higher price than the mere value of the land for cultivation.

The situation, the view, the social and other amenities, the sporting possibilities and many other things, have to

Thus it is that an estate earning not more than 2 per cent need not be either "overvalued or inefficiently

cultivated."

As to the breaking up of farms and estates into small holdings—the majority are unsuitable. Much of the land of England is not good enough, and many of these holdings would not be sufficiently near to a market town or a railway station to be profitable to small holders.

Government small holdings have been a very costly experiment, and in the main unprofitable, for the simple reason that a high anough rent cannot be read to be

reason that a high enough rent cannot be paid to bear reasonable interest on the outlay on buildings and fencing necessary to equip them.

necessary to equip them.

Where conditions are favorable they can be carried on profitably, but the land and other conditions vary so much here it would be unwise to establish them everywhere.

E. P. S. Howden, Yorkshire, Eng.

The Goal of Final Disarmament

To the Editor of THE CHRISTIAN SCIENCE MONITOR:

To the Editor of The Christian Science Montron:

The recent disaster at Lake Denmark, N. J., comes, strangely enough, at the very time when the world is being questioned on the momentous issue of armaments from its many points of view.

Is it any wonder that we are constantly hearing from different parts of the world that although the East becomes interested in the West's presentation of Christianity, it complains that what the World War showed to it is that the West is not consistent in its application of the teachings it professes to follow.

The reading of the story of the disaster in New Jersey ought to waken us all to let our voices be heard in an half-hearted way in favor of armament reduction, with the goal always in view of final disarmament. C. K. N. Philadelphia, Pa.
